

Theralux Active™ Filter Pro

# Setting the benchmark in pool water filtration.

Durable, twin layered tank

Fine filtration for crystal clear water

Simple to use and maintain

## Designed and built tough the twin layered filter tank provides extra strength for a longer life.

The revolutionary twin layered tank features a strong Polyethylene inner layer that is reinforced with a robust, durable Fibreglass outer layer, ensuring an exceptional lifespan.

### FEATURES

- High flow filter tank internals provide supreme water recirculation
- Top diffuser for even water distribution over filter media bed
- 360 degrees clamping collar for ease of connection
- Sight glass to view when backwashing cycle is completed
- High quality oil filled pressure gauge
- ABS internal lateral assembly
- UV stabilised and corrosion proof

Combined with the Recycled Glass Filter Media it provides crystal clear water clarity and a healthy pool all year round.
