

Theralux Active™ Recycled Glass Media

Superior Water Filtration that is gentle on nature.

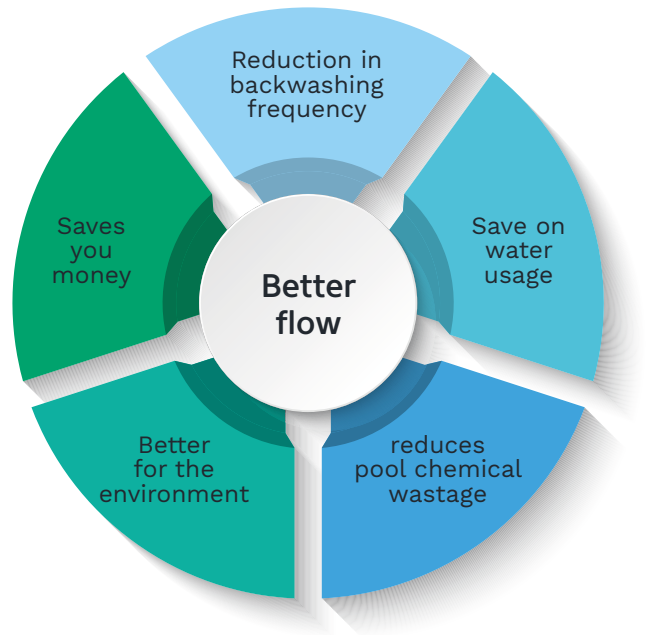

-  100% Recycled material
-  Fine filtration
-  Healthier pool water

Made from 100% recycled material, the filter media is environmentally friendly and boasts a reduced carbon footprint when compared to traditional filter media.

The products smooth surface provides filtration and discourages bacteria growth, making it the best choice for cleaner, healthier pool water.

Designed to provide better flow through your filter tank it reduces your backwashing frequency, saving water usage and reduces pool chemical wastage.

When incorporated into the Complete Mineral Pool system, it provides a mild flocculation of matter such as dust, dirt and algae. Once these particles become coagulated, a natural electrostatic charge pulls the fine debris into the filter and traps it.

FEATURES

- Fine filtration down to 3 microns
- Smooth design reduces bacteria growth
- Provides superior water flow inside the filter
- Triple the life of other filtration media
- Exceptional cleaning ability

Options

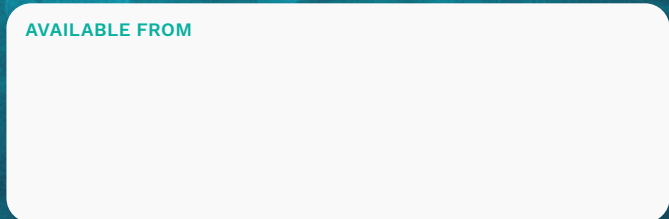

Product code	Description
THERAG6001	Recycled Glass Filtration Media - Fine
THERAG6003	Recycled Glass Filtration Media - Coarse

 **Theralux Active™ Lifetime Pool Care**
Exclusive customer care and support for the life of your pool
