

# Anderson Mag-Stik

#0648 - 48" Carbon Fiber Handle

#0696 - 96" 2 Piece Carbon Fiber Handle

The Anderson Mag-Stik handle is a foam filled Carbon Fiber Handle with a threaded 10mm adaptor in the end. The included 10mm stud and bolt will allow you to attach most common sized magnets that this handle was designed for. Also included are 5mm and 6mm hex wrenches for the fasteners.

The Mag-Stik is designed to be used with magnets that have a diameter of roughly 3 inches and pull of 600lbs. Using larger magnets with excessive pulling force may damage the Mag-Stik
