## SIZE GUIDE FOR RINGS

Before you order your new ring you need to know the correct size of it.

If you already know your number please fill the box and continue with your order. If not, please follow some easy steps we prepared for you and continue.

### First Step

Think of the finger you are going to wear your new ring.

Right or left hand matters too, because there are most often differences between the two hands.

### Second Step

If you already have a ring for this finger, please measure its inside diameter and select the size according to the following diagram. Please, make sure you measure only the inside circle of the ring. If your ring fits between two sizes, larger size is recommended.
