3M LANDPLANE TESTIMONIAL

Talking with Brad Allen on his 480ha operation at Pouto, Northland about his 3m Landplane.

"We have bought a fair bit of gear of Farmshop and one of the most useful things has been the Landplane. It cuts in the front and levels in the back, so works really well on rough and pugged paddocks where an hour or so with the Landplane levels and smooths everything else into a nice clean paddock. We also use it for drain cleanings, general farm and track repair - yep it's been a really useful implement." Brad Allen, Pouto.
