

Features & Benefits of Peecon Biga Future Series

- 1** Patented shape Future tub for optimal mixing the Biga Future series have a unique, patented tub form, ensuring optimum use of the mixer's capacity. The Biga Future stands out because of its unique tub shape and reliable drive line. This way, continuity is ensured. The Biga's unique shape helps stop over boiling, eliminated food trapping which in older versions could contaminate the feed mix.
- 2** Tub thickness - The tub is made out of 8 mm steel.
- 3** Weighing system - Voted BEST in the World - integrates with your PC system so you can record and monitor feeding outputs. PLUS the option to link auxiliary screens in your loader/tractor all this combined with a unique fall away system for accurate dosage.
- 4** Support - Heavier support with the possibility of fast coupling.
- 5** Couple height - Broad choice of draw-bar models for the proper couple height. Set the coupler to suit your model of tractor.
- 6** Extension - Retro-fitted for an extra 2-3 m³ of volume
- 7** Peecon Long-life blades - Long-life blades are provided with extra powder-hardening for a very long lifetime.
- 8** Double Action augers - Twin Augers for fast mixing! The unique Peecon Double Action augers are tuned for each model feed mixer according to the thickness and width of the tub. This allows for a fast and good mixing result. The two sweepers ensure uniform unloading.
- 9** Double Cutting Knife - for optimisation of cutting lengths
- 10** Wide range of tyres options - Depending on the type of machine and the diversity of circumstances, Peecon has a wide range of tyres available and at Farmshop we can recommend and supply tyres especially fitted to suit your farm location and terrain.
- 11** Heavy Duty Gearbox - The completely enclosed heavy duty gear box means it never comes in contact with damaging external pressures EG bales jamming and that no dust, moisture, grit or residue can penetrate the gearbox - ensuring reliability and peace of mind.
