A leading maker of **deluxe** ceramics

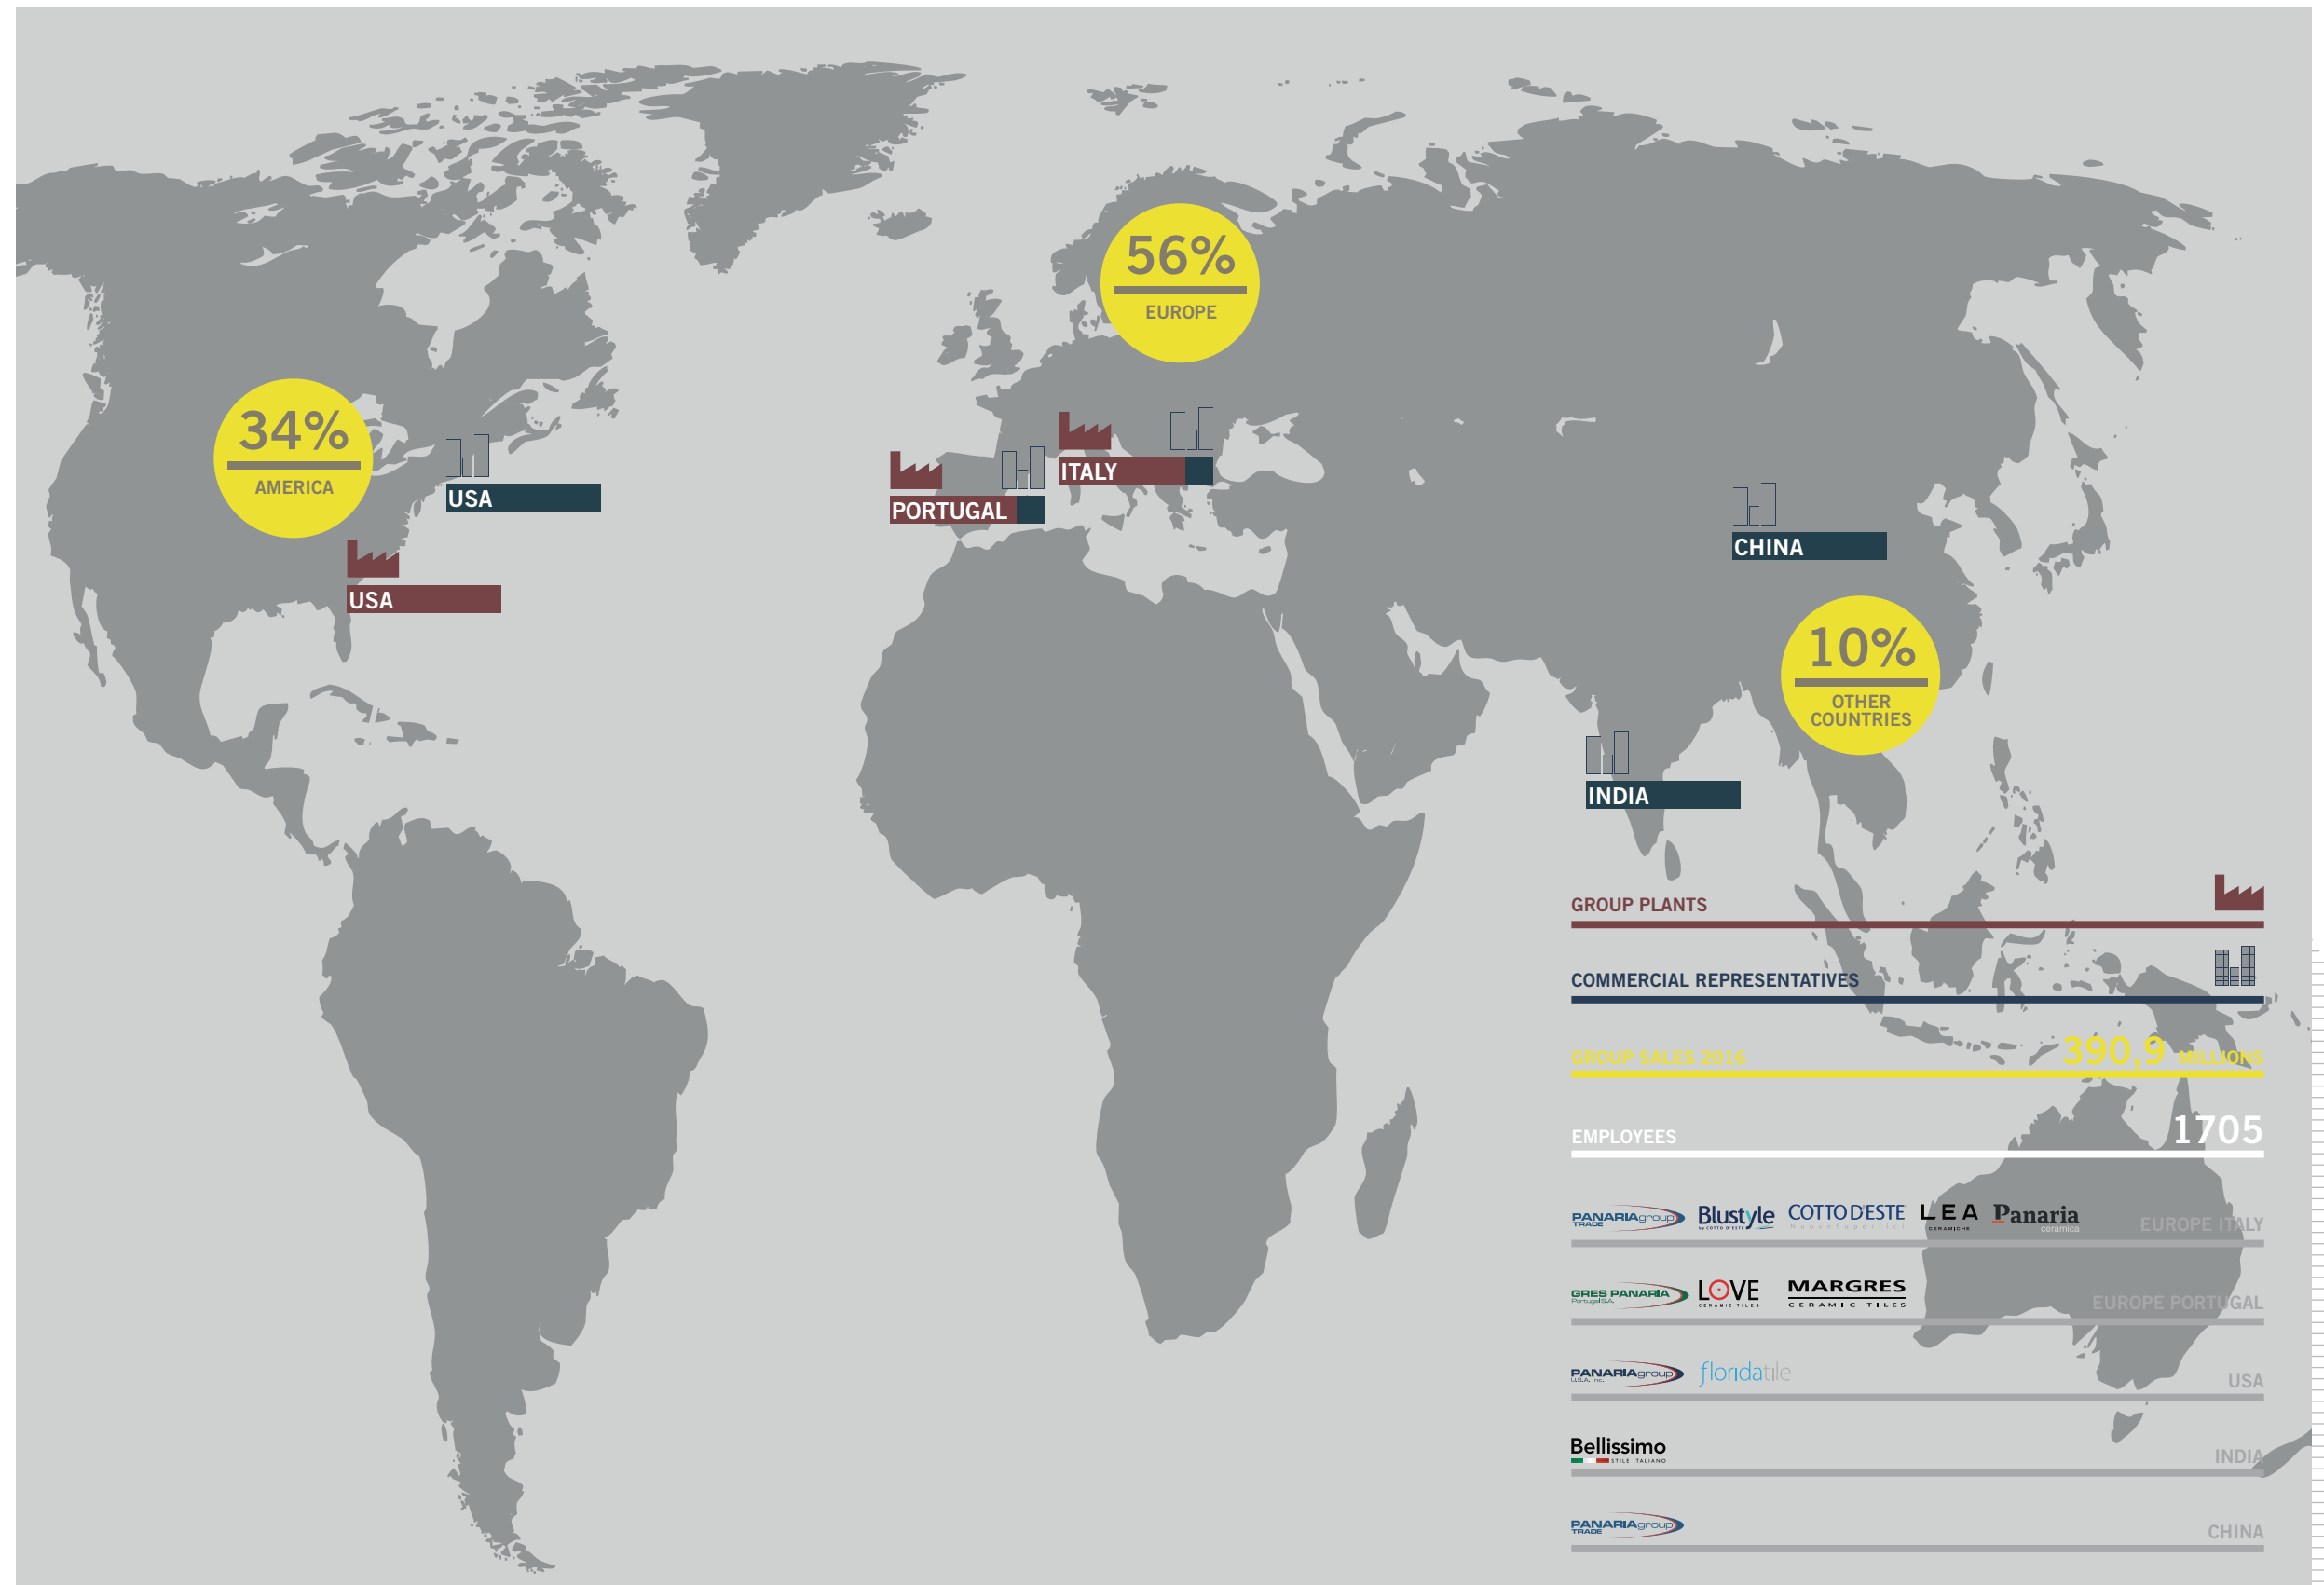

The strength and international breath of Panariagroup.

Panariagroup is one of the leading manufacturers of ceramic tiles for floors and wall cladding in the world. The group has production sites in Italy, Portugal, USA and has a presence in over **one hundred countries** thanks to a broad, established and widespread sales network. Specialised in the production of porcelain stoneware tiles, the company is positioned in the **ultra-luxury market segment** targeting a differentiated and discerning customer-base looking for top quality aesthetics and technology.

⊕ Highlights

Panariagroup has a presence in over 100 countries in the world

The group positions itself in the high-luxury market segment

Bellissimo: our **values**

+ **Elegance**

The charm of Italian style: an aesthetic culture that has imposed its taste across the world, enhancing the most prestigious of living spaces.

+ **Technology**

Evolution, performance and know-how co-exist and share a perfect balance that represents the maximum of "Italian-ness" in the world.

+ **Innovation**

Ongoing research into materials, to constantly improve our aesthetic, technical and quality standards.

+ **Italian style, indian feeling**

Renowned Italian reputation and style meets the needs of Indian living. Unique collections to enrich the most sought-after architecture projects and residential venues.

The **technology** know-how

Avant-garde machinery and constant innovation for unrivalled quality standards.

Panariagroup has always set itself apart thanks to its focus on research and innovation. The numerous production sites of the group are equipped with cutting edge machinery and production tools and the company also has an in-house research centre able to develop avant-garde application and aesthetic solutions, which help the company maintain its position as one of the industry leaders across the world.

+ **Highlights**

In-house research centre equipped with advanced technology

Innovation means evolution and ability to improve products quality

To live healthy, safe and secure

The exclusive Panariagroup technology for antimicrobial floor and wall coverings with the highest performance.

POWERFUL ACTION
eliminates microbes and prevents their reproduction

CONTINUOUS PROTECTION
always active, 24 hours a day, with and without sunlight

ETERNAL EFFECTIVENESS
thanks to the technology permanently integrated into the product

GUARANTEED QUALITY
by the partnership with

MICROBAN[®]

The **best** of Italy, the **best** of India

Bellissimo

 STILE ITALIANO

Bellissimo sets out to be the point of reference for planners, interior designers, architects and end users who are looking for products able to combine the highest technical standards and the refinement of Italian ceramics, that, for centuries, have been the symbol of unique excellence throughout the world.

Blustyle
by COTTO D'ESTE

Blustyle Ceramica is the trademark representing a new generation of products, which combine top quality with the best price, thanks to a careful sales and organisation policy. Products are manufactured with great concern for the environment and using carefully selected raw materials.

COTTO D'ESTE
Nuove Superfici

Cotto d'Este is the trademark that best represents the group's dedication to top quality and deluxe products, by virtue of the carefully crafted details and finishes and the high aesthetic and technical quality. The success both in Italy and abroad has been considerable, as demonstrated by prestigious references all over the world.

LEA

CERAMICHE

Lea is the trademark offering a trendy product range, with an international flair, characterised by top level design, ideal for modern environments.

The trademark boasts the co-operation of internationally known architects, such as Zaha Hadid, Patrick Norguet and Diego Grandi; a prestigious showroom in Milan, the capital city of design, has been recently opened in Via Durini.

Panaria
ceramica

The Panaria trademark is the expression of the great tradition of the group when it comes to “making ceramics”. Its extensive and articulated range of products combines the ancient art of ceramics with the latest trends. Today, apart from playing a leading role in the domestic market, the company is winning great appreciation on an international level.

Ceramics of Italy

Collections

Arborea

The inspiration for ARBOREA comes from the most classic and elegant wood essence, in a new format and a new surface finish. The high number of graphic patterns combinations, achieved by adopting HD digital technology, combined with the use of innovative dies, will allow you to perfectly combine the natural beauty of wood with the resistance of the best quality porcelain stoneware.

Basaltina Stone Project

The hard, intrinsic power of stone.

The power of earth crystallizes in lava stone. Basalt rock, made of heat, ashes, gas and energies thousands of years old. Its natural grey comes back to life again in ceramics, taking on new tones and variations. It fills spaces with subtle style, as every vein holds a story within.

ANTIBATTERICO - ANTIMICROBIAL

Stone effect slabs that reproduce the veins and characteristics of stone. Different veining for each individual piece, artificial markings that overlay the consistency of the material. The essence of each collection is not in the single piece but in the movement created on the surface. The range of possible uses are easy to imagine especially by designers and confer a creative freedom in architectural design that ensures extensive personalisation.

Metropolis

Return to material texture, in all its simplicity and purity.

The tough and rugged nature of cement makes a comeback in the Metropolis collection, characterised by surfaces with an extremely natural effect. The rough look goes with a surprisingly sensual feel: the beauty of an ancient material becomes softer and more welcoming to the touch, renewed in a reassuring tactile experience. Metropolis is the ideal surfacing material for covering any kind of interior or exterior volume: a ceramic lining material that acts as a second skin for spaces aiming for new kinds of simplicity.

Italian certificates

The continuous search for excellence has led Panariagroup to invest in the latest technology. Amongst the many advantages, the latter has permitted us to reduce emission of gas into the atmosphere to the minimum levels possible: at least ten times lower than the strict thresholds of Italian laws. Emission levels also fulfil the requirements of the Kyoto Protocol for reduction of GHG.

By means of extremely modern plant, Panariagroup can convey the heat produced during the tile firing stage to the equipment used for preparing mixtures. By doing so, the consumption of natural gas is reduced by at least 25%.

All discarded green material - i.e. green material that does not fulfil our high standards of quality - is recycled. Since this material is not fired, it can be fed back into the initial stages of the production process hence reducing the amount of raw materials needed. Fired rejects that cannot be fed back into the production cycle, since they would adversely affect the characteristics of the mixture, are recycled externally. In other words, they are used for the production of bricks or road substrates thus reducing the natural materials generally used for these purposes.

The tile production process calls for a significant amount of water. To save such an important resource, Panariagroup recycles all the water employed during the production cycle. This reduces the consumption of water by 60%. Furthermore, the water used during the production process is in no manner disposed of in the environment.

All materials used for packing our products (cardboard boxes, plastic, wooden pallets, etc.) can be recycled. As a further environmental guarantee for the forests of countries importing our products, all our pallets are made without bark (in accordance to the IPPC / FAO ISPM 15 standard).

Apart from keeping a constant control on the work environment, Panariagroup invests in training courses for staff concerning the environmental and safety aspects of the production activities. We promote the reduction of noise levels both inside and outside our factories, as established by the laws in force.

To continuously improve its policy, Panariagroup periodically checks its entire environmental protection package by means of Environmental Audits performed by independent certifying bodies and by qualified in-house personnel.

Leed

Panariagroup is a member of the U.S. Green Building Council, organisation of the USA demonstrating that a building is environmentally responsible, profitable and a healthy place to live and work. Purpose of LEED (Leadership in Energy and Environmental Design Green Building Rating System™) is assessing the environmental, social and economic sustainability of buildings on the basis of criteria such as energy efficiency, polluting emissions and the use of recycled materials. LEED supplies professionals of the building trade (designers, architects, etc.) the tools needed to calculate the impact of their buildings in terms of eco-sustainability.

Emas

EC Regulation no. 1221/2009 of the European Parliament and of the Council introduced the EMAS eco-management and audit scheme for organisations. Panariagroup has obtained EMAS Registration for all its production sites: Finale Emilia (MO) (registration n.I-000309 on April 2005), Toano (RE) (registration n.I-000239 on September 2004) and Fiorano Modenese (MO) (registration n.I-000401 on December 2005). This registration is of major importance, since it requires a proper Environmental Management System to be created, based on the continual improvement of environmental performance within organisations. The scheme is based on the creation of an open dialogue with local institutions (Agencies, Authorities, Associations, Trade Union Representatives, Schools, Press) and with the public, and it is expected that all employees will play an active part. The Environmental Statement is the end document that describes the environmental and safety aspects in the workplace, the environmental performance of the site and the environmental targets that the Company sets itself within the framework of continual improvement. The statement is validated by an Accredited Environmental Verifier, following audits carried out in the plant. Panariagroup is one of the very few ceramics companies to have EMAS registration which, together with the ECOLABEL and ISO 14001 quality certification, bear witness to the management's utmost commitment and readiness to engage with the ethical, environmental, safety and quality issues. The Environmental Statements of all company's sites are available on the web site www.panariagroup.it.

UNI EN ISO 14001

ENVIRONMENTAL CERTIFICATION FOR PRODUCTION SITES

Ecolabel

IT 021/010

THE ECOLOGICAL QUALITY MARK OF THE EUROPEAN UNION

PRODUCTION PROCESSES WITH A LOWER CONSUMPTION OF ENERGY

LESS EMISSIONS IN AIR AND WATER

IMPROVED CONSUMER INFORMATION AND WASTE MANAGEMENT

Ecolabel is a product certification scheme, created by the European Community (EC Regulation n°1980/2000), to enable consumers to choose and purchase "green", environmentally-compatible products. These products conciliate quality and a higher standard of living with respect for the environment. The flower logo is easily identifiable and certifies the ecological excellent of Panariagroup tiles. The lifecycle of products with this logo has been accurately analysed, in terms of eco-compatibility, from every point of view and throughout all stages of production. From the origin of raw materials to disposal of the product, the following aspects are all taken into account: the quality of air and water of production facilities, preservation of surrounding soil, reduction of by-products, energy saving, protection of the ozone layer and impact on biodiversity. For information about the Ecolabel, see: www.ecolabel.eu

EN 14411

The European Union specifies the Guidelines to protect the safety and health of people and property in building works by the Directive 89/106/EEC. Within this context, the building materials must feature certain safety requirements to bear the CE mark; since 1st December 2005, such mark is compulsory for ceramic tiles, too (European Norm EN14411).

Indian certificates

Cleaning

"AFTER-INSTALLATION" CLEANING

1. "After-installation" cleaning is compulsory, both for glazed and non-glazed tiles.
2. An after-installation cleaning carried out not accurately, or not carried out at all, often results in halos preventing the floor to be kept clean despite of a careful daily cleaning.
3. To ensure an optimal cleaning, the use of a single brush with suitable disks (green for structured/anti-slip surfaces, red for the others) is recommended.

4. CEMENTITIOUS GROUTS MIXED WITH WATER

To ensure an optimal cleaning, the use of a single brush with suitable disks (green for structured/anti-slip surfaces, red for the others) is recommended.

Residue to be removed	Cementitious grouts, slurry, cement, lime			
Detergent type	Acid-based			
Detergent name	KERANET	CEMENT REMOVER	DETERDEK	LITOCLEAN PLUS
Manufacturer	MAPEI	FABERCHIMICA	FILA	LITOKOL

For the use, follow the specific instructions by the manufacturers.

After performing the washing described above, it is necessary to wash with a basic or alkaline product, namely a degreasing detergent (see point 5 of table). Acid washing can leave greasy marks on the floor, which tend to withhold dirt.

NOTE: for cementitious grouts with additives (latexes, resins, etc.), remove immediately with sponge and plenty of water. Then, treat the floor according to the instructions in points 3 and 4.

Always make preventive tests before the use (on a tile not laid yet), above all on lapped or polished products.

Do not carry out the "after-installation" cleaning if the tile temperature is high; in summer, clean during the fresher hours of the day.

5. EPOXY GROUTS

The removal must be carried out immediately and carefully with sponge and plenty of water, as these grouts harden very fast, even in a few minutes. The following day carry out a thorough cleaning with alkaline detergents; a few of them are indicated in the table below.

Operation	Thorough cleaning			
Detergent type	Alkali-based			
Detergent name	WAX REMOVER	PS 87	CIF Degreaser with bicarbonate	LITONET
Manufacturer	FABERCHIMICA	FILA	UNILEVER ITALIA	LITOKOL

For the use, follow the specific instructions by the manufacturers.

Cleaning

6. ANTI-SLIP SURFACES

Due to their special features, rough or structured anti-slip surfaces are harder to clean. After the grouting, it is important to remove the excesses in a short time and by frequent washing with sponge and water, till the floor is perfectly clean. Then, carry out an acid washing using a single brush with green disks.

DAILY CLEANING

Carry out the daily/routine cleaning with neutral detergents or degreasers, diluted in warm water, following the procedures indicated on the packages. The following products, which can be easily found on the market, are recommended.

Operation	Daily cleaning				
Detergent type	Neutral or degreaser				
Detergent name	GLASSEX degreaser	SMAC ULTRA degreaser	CIF Degreaser with bicarbonate	FLOOR CLEANER	FILA CLEANER
Manufacturer	RECKITT BENCKISER	BOLTON MANITOBA	UNILEVER ITALIA	FABERCHIMICA	FILA

EXTRAORDINARY CLEANING

It is carried out to remove very old or resistant stains or residues. The table below indicates detergents suitable for the stain type.

Residue to be removed	Coffee, coke, fruit juices, waxes, greases, etc...	Wine	Calcareous deposits	Rust	Inks, felt pens	Tyres, rubber marks, suckers, metal or pencil marks						
Detergent type	Neutral or degreaser		Oxidizing	Acid-based	Acid-based	Thinner-based	Abrasive paste					
Detergent name	Coloured Stain Remover	PS 87	CIF Degreaser with bicarbonate	OXIDANT	VIAKAL	Diluted hydrochloric acid	Nitro thinner, trichloroethylene, turpentine	Coloured Stain Remover	VIM CLOREX	POLISHING CREAM	DETERGUM	Eraser (for pencil marks only)
Manufacturer	RECKITT BENCKISER	FILA	UNILEVER ITALIA	FABERCHIMICA	PROCTER & GAMBLE	Several manufacturers	Several manufacturers	FABERCHIMICA	GUABER	FABERCHIMICA	ZEP ITALIA	-

IMPORTANT: always make preventive tests before the use (on a tile not laid yet), above all on lapped or polished products.

REMOVAL OF WAXES OR POLISHING COATS

Do NOT use waxes on floor and wall tiles.

			
New floor that has been cleaned after installation in accordance to the instructions provided on the previous pages.	Detergents for routine cleaning that contain wax tend to deposit on the floor and create glossy films.	Simple substances (Coca Cola, wine, water, etc.) will remove this glossy film and give the floor its initial matt appearance.	To remove the glossy film, use a suitable detergent (undiluted Tile Cleaner by Faber). Daily cleaning should be performed using a detergent that does not contain wax.

Often, the standard detergents available on the market contain waxes or polishing additives that, washing after washing, deposit glossy coats on the floor causing halos and problems. This kind of coats can be deposited even by some grouts for joints. Simple agents such as coke, wine, water, etc... falling on the floor remove this glossy coat and restore the original duller look of the tiles. Amid a glossier floor, the areas without wax look like dull halos: instead, they are the only clean floor areas. In these cases, first of all the whole floor must be dewaxed, following the indications of the table below. Then, use the detergents of the table besides for the routine cleaning.

Residue to be removed	Glossy coats left by detergents	
Detergent type	Acid-based	
Detergent name	VIAKAL*	Pure TILE CLEANER *
Manufacturer	PROCTER & GAMBLE	FABERCHIMICA

(*) Do not follow the indications on the package, rather apply the pure detergent, leave it for 15-30 minutes, rub with soft or lightly abrasive pads (white, yellow, red), then rinse thoroughly with water.
