StrongBrain™ Kids

StrongBrain™ Kids is a delicious and natural omega-3 chewable burstlet, specially formulated with highly concentrated and purified deep sea fish oil rich in Eicosapentaenoic Acid (EPA) and Docosahexaenoic Acid (DHA). EPA and DHA are Omega-3 essential fatty acids required for the healthy growth of a child, helping to support cognitive development and learning, visual development, immunity and overall brain health.

Ingredients

Omega-3 fish oils EPA and DHA are **essential fatty acids (EFAs)** that cannot be produced by our body and must be consumed from the diet. They play a vital role for **children's cognitive and neurological development as well as immune health.**

Research have shown that children who obtained adequate amount of **omega-3s showing significance positive results in their physical, cognitive and social performance**, while negative results when omega-3s are lacking.

EPA (Eicosapentaenoic Acid)

EPA is effective in supporting **cognitive function, academic performance, child's behavior, concentration and focus.** Sufficient EPA helps to:

- > **Support** brain health at cellular level
- > **Boost** memory, alertness & concentration level
- > **Regulate** of mood and emotional well-being
- > **Support** immune & neurotransmitter function
- > **Reduce** inflammation
- > **Help** reduce skin allergies

DHA (Docosahexaenoic Acid)

DHA is important for **healthy cellular structure, growth and development of the brain and vision.** Sufficient DHA helps to:

- > **Support** cognitive development & function
- > **Support** visual development & function
- > **Promote** cardiovascular function
- > **Reduce** inflammation

Store in a cool and dry place. Once protection seal is opened, best consume within 2 months. Keep out of reach of children, unless under adult supervision.

Precaution:

If you are taking medication or have a medical condition, you should consult your health care specialist prior to using this product.

Formulated in USA.

Made in Italy.

FAQ

Is DHA or EPA more important?

Children require an adequate supply of DHA for the growth and development of the brain, central nervous system (CNS), and retina of the eye. After the age of 5, the development of the brain and CNS gradually reaches maturation and the need for DHA is reduced. This is where the intake of EPA should increase as studies show that EPA can help with childhood behavior and academic performance by improving learning abilities and concentration. Sufficient intake of EPA is also helpful in relieving inflammation, dry skin conditions and allergies. Hence, the right proportion of EPA and DHA is crucial to provide optimal nutritional benefits for a child's brain health. StrongBrain™ Kids contains of EPA to DHA to provide the highest nutritional value for your child!

How soon will my kids be able to see improvements in their brain health?

How soon is suggested to take StrongBrain™ Kids dependively for 3-6 months for improvements in brain health. However, do note that results vary among individuals. For the best results, take StrongBrain™ Kids on a long term basis for continuous nutritional support.

Will the long term consumption of StrongBrain™ Kids result in any side effects?

No known side effect has been observed. StrongBrain™ Kids does not contain hormones and all ingredients are tested and approved to ensure safety, purity and efficacy. It is therefore safe for long term consumption at the recommended dosage.

Can my child consume StrongBrain™ Kids with other supplements at the same time?

Yes, StrongBrain™ Kids is 100% natural and will not cause any interaction when consumed with other supplements.
