Enhance Sports Performance and Joint Health

StrongJoint™ Sports Advanced Joint Restoration Complex is scientifically formulated with premium nutrients for those who regularly engage in sport activities. It helps to improve **athletic performance** and **promote optimal joint health**. Fortified with **Collagen Type II**, Chondroitin Sulfate, Hyaluronic Acid and BioPerine®, it can help to maintain **endurance**, **performance level** and **promote flexible and healthier joints**.

Comparison between Healthy & Damaged Joint

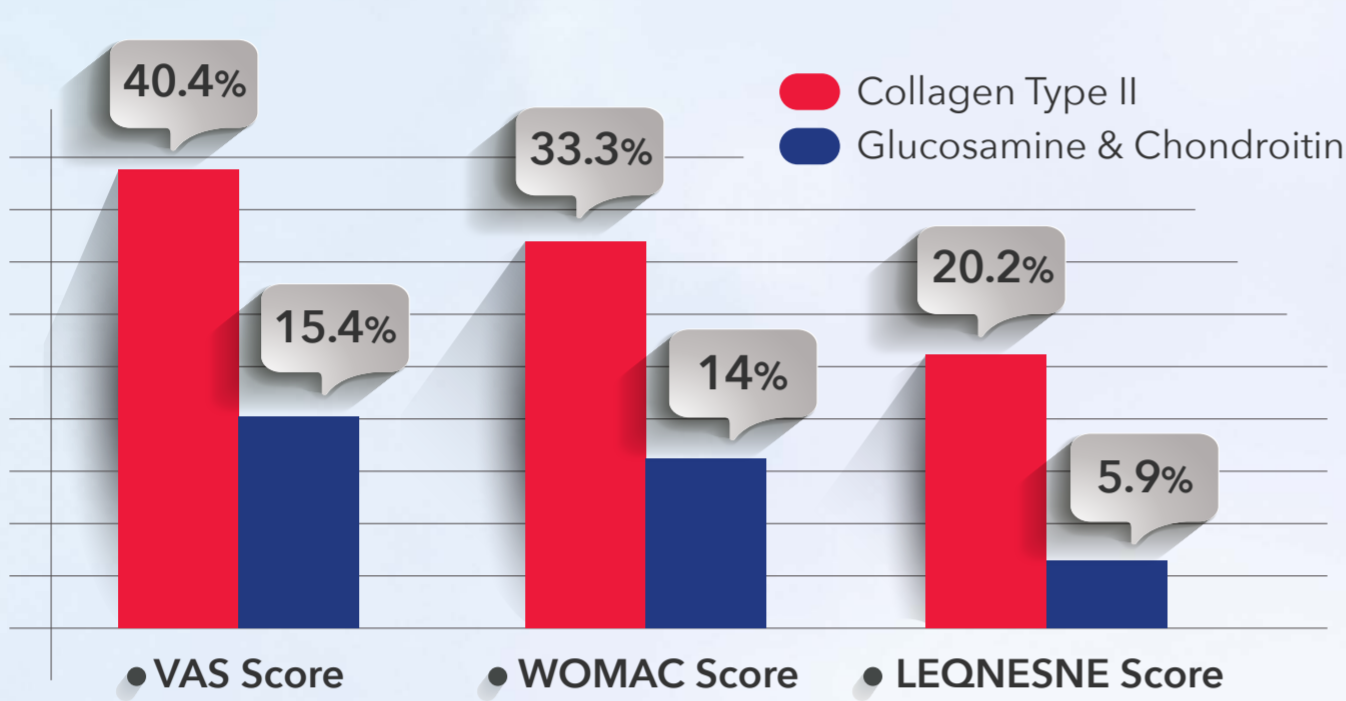

*Our joints sustain a certain amount of wear and tear as we age. However, sportspeople face faster cartilage degeneration due to forceful exercise impact.

Ingredients

Collagen Type II:

UP TO 342% more effective than Glucosamine & Chondroitin!

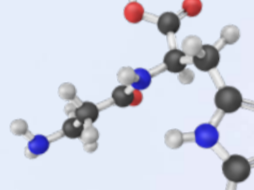

Clinical studies showed that **Collagen Type II** outperformed the glucosamine/chondroitin combination in supporting joint health and mobility.

Source: Crowley et al(2009). Safety and efficacy of undenatured type II collagen in the treatment of osteoarthritis of the knee: a clinical trial. International Journal of Medical Sciences.

Collagen Type II is a natural protein that helps to protect our tendons and ligaments during intense exercises, as well as promoting faster recovery of the joints' connective tissues. Studies show that Collagen Type II has multiple protective benefits to our joints. It helps to:

1. Resist cartilage protein digesting enzymes.
2. Reprogram destructive chondrocytes to lessen inflammation.
3. Promote new cartilage and proteoglycan synthesis.
4. Enhance the production of Hyaluronic Acid (HA), producing a thick, effective & lubricating synovial fluid that protects and cushions joints.
5. Protect the surface of cartilage from oxidative (free radical) damage and enzymatic digestion.
6. Act as a powerful anti-inflammatory / pain modulator which is extremely helpful for sports persons.

Chondroitin Sulfate

Chondroitin Sulfate is part of the structural components of joint cartilage. Via supplementation, it may help to promote healthy joint cartilage by absorbing fluid and promoting elasticity.

BioPerine® (Piperine extract)

BioPerine® is a Piperine extract formula that can help increase the bio-availability and absorption of nutrients.

Hyaluronic Acid

Hyaluronic Acid is a gel-like substance. The highest concentration can be found in connective tissues such as skin and cartilage. It may promote healthy joints via lubrication and shock absorption in the joints.

Benefits of StrongJoint Sports™

Support recovery after sports

Nourish joints & cartilage

Improve sports performance by increasing oxygen supply

Maintain healthy joints connective tissue

Promote overall joint flexibility & joint health

Supplement Facts

Serving Size: 3 Capsules

Capsules Per Container: 90

	Amount Per Serving	% Daily Value
Collagen Type II	900 mg	*
Chondroitin Sulfate	198 mg	*
Hyaluronic Acid	72 mg	*
BioPerine® (Piperine extract)	15 mg	*

*Daily Value not established

How are We Different from Others?

Other Joint Supplements

StrongJoint™ Sports Advanced Joint Restoration Complex

Source	Contains single / few ingredients such as Glucosamine, Chondroitin and MSM for pain relief only.	Contains scientifically tested nutrients including Collagen Type II, Chondroitin Sulfate, Hyaluronic Acid and BioPerine® to support recovery after sports.
Capsule	Hard tablet or Gelatin capsules that may contain Sodium Lauryl Sulphate	Shellfish-free formula
Result	Unknown.	Scientifically Tested.

Instructions

Directions of Use:

For adults, take 3 capsules daily. Consume after meals.
