Take action before it's too late

### Holistic Solution for 3 Highs!

CardioCare™ Ultimate Blood Indices Support is a holistic formula designed to promote cardio health. It contains new scientifically researched ingredients known as the CardioFlex™ Proprietary Blend, which helps to optimize the cardiovascular system by maintaining healthy blood sugar levels, serum lipid levels and blood pressure. CardioCare™ further improves blood circulation and healthy vasodilation with the addition of L-Arginine and L-Citrulline.

### The Circulatory System

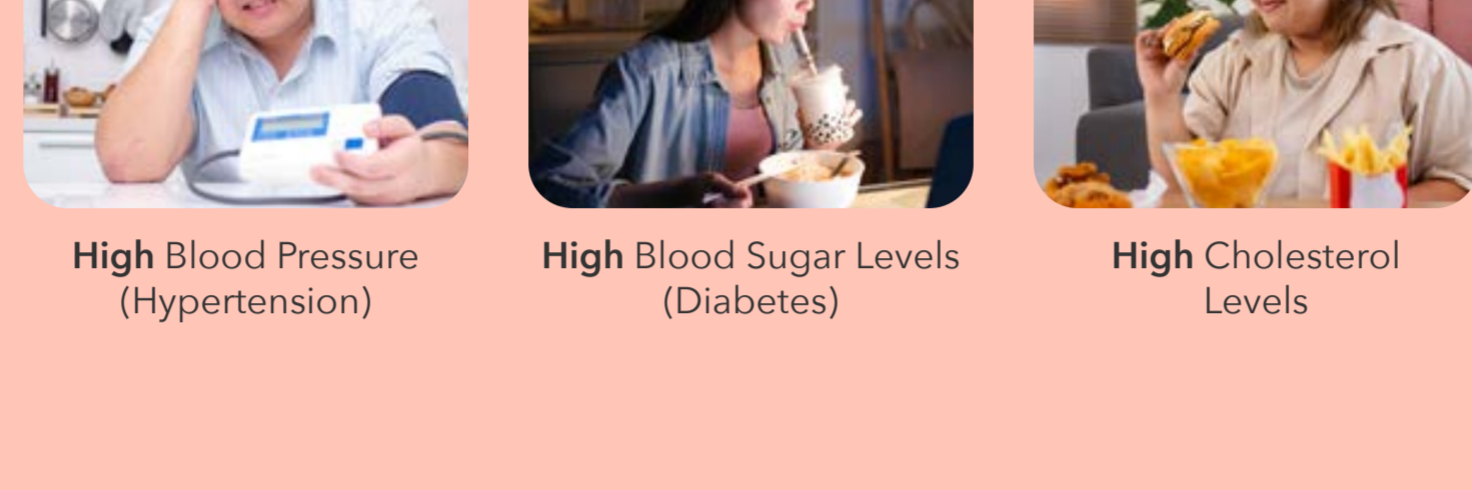

Healthy arteries are flexible, strong and elastic. Their inner lining is smooth so that blood flows freely, supplying vital organs and tissues with adequate nutrients and oxygen.

### What Causes Heart Disease/Stroke?

1. Build-up of fatty deposits on the walls of arteries  
Artery walls become harder and less elastic over time, which can narrow arteries and make it harder to get blood to your body's organs.

### 2. The 3 Highs

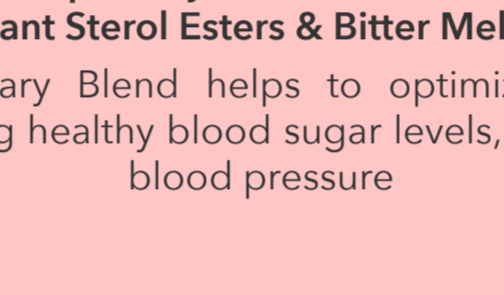

### GOOD NEWS!!

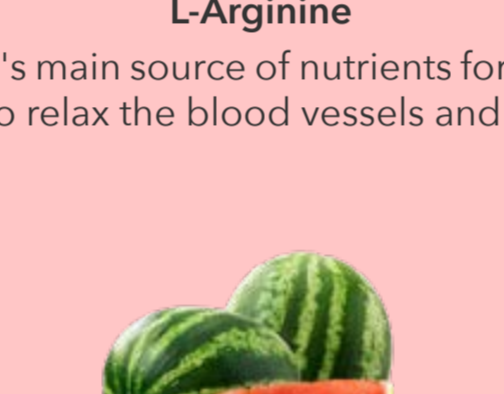

3 Highs are the risk factors that you can change!  
It is never too late to start adopting heart-healthy habits to reduce your risk of cardiovascular disease.

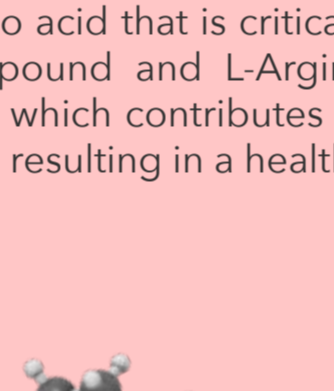

### Ingredients

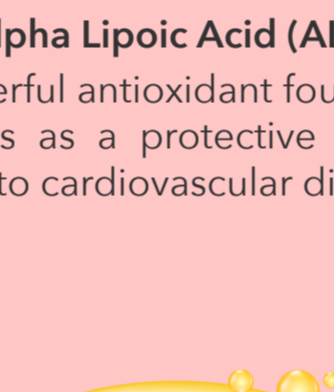

CardioFlex™ Proprietary Blend (Terminalia Arjuna Bark Extract, Plant Sterol Esters & Bitter Melon Extract)  
CardioFlex™ Proprietary Blend helps to optimize the cardiovascular system by maintaining healthy blood sugar levels, serum lipid levels and blood pressure

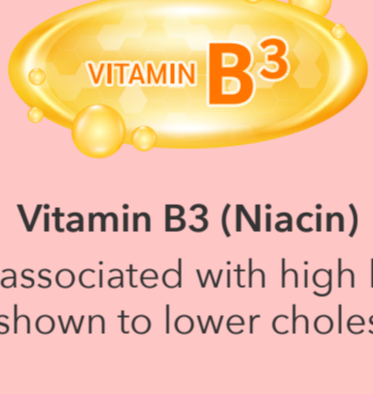

L-Arginine  
L-Arginine is the body's main source of nutrients for producing nitric oxide (NO), which helps to relax the blood vessels and improve blood flow.

L-Citrulline  
L-Citrulline is also an amino acid that is critical to produce nitric oxide. A combination of this compound and L-Arginine promotes the body's production of nitric oxide, which contributes to healthy vasodilation and blood circulation, resulting in a healthy blood pressure.

Alpha Lipoic Acid (ALA)  
Alpha-lipoic acid is a powerful antioxidant found naturally in our diet. It is well known that ALA acts as a protective agent against factors that contribute to cardiovascular disease (CVD).

Vitamin B3 (Niacin)  
Cardiovascular disease is associated with high levels of cholesterol in the blood. Niacin has been shown to lower cholesterol levels in the blood.

Vitamin E (DL-Alpha Tocopheryl Acetate)  
There is evidence that eating foods rich in vitamin E reduces the risk of coronary heart disease in middle-aged and elderly individuals.

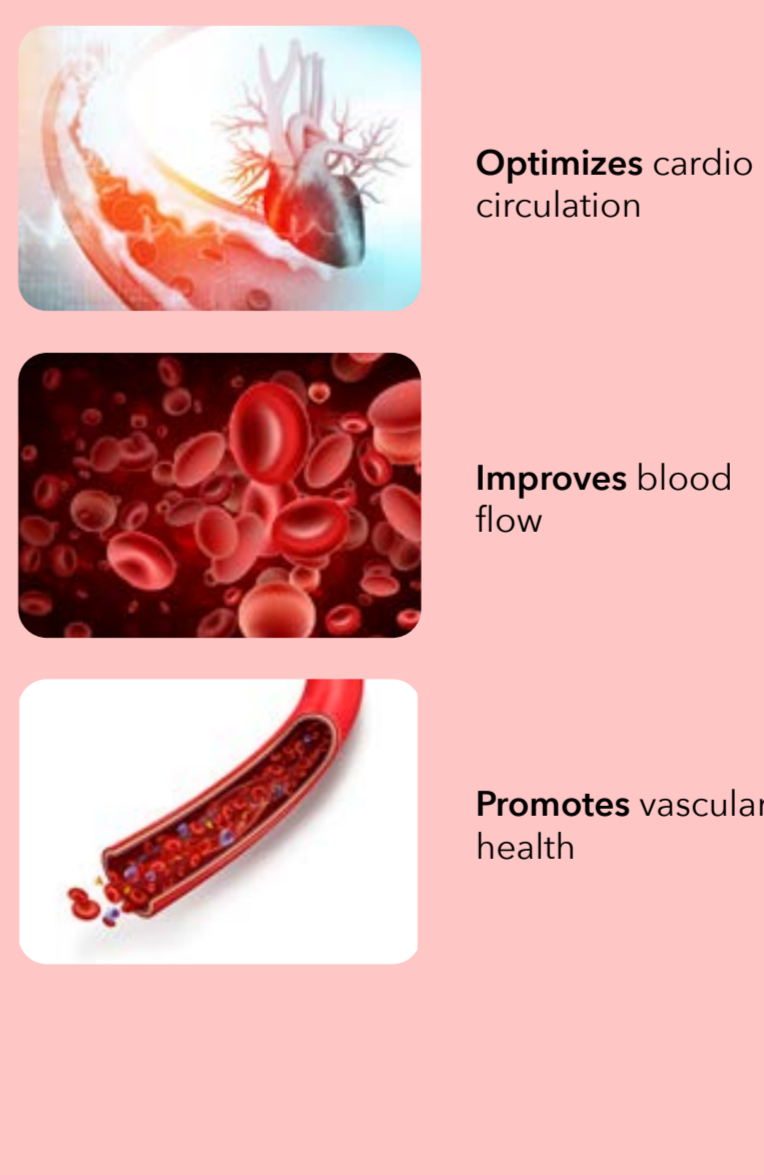

Supplement Facts		
Serving Size: 2 Capsules	Amount Per Serving	Servings Per Container: 30
		% Daily Value
CardioFlex™ Proprietary Blend (Terminalia Arjuna Bark Extract, Plant Sterol Esters, Bitter Melon Extract & Hesperidin)	890 mg	*

\*Daily Value not established

### How Does It Work?

Maintains healthy blood sugar levels, serum lipids levels and blood pressure

### How are We Different from Others?

	Other Cardiovascular Supplements	CardioCare™ Ultimate Blood Indices Support
Source	Simple/Few plant-derived ingredients.	100% Natural and Safe. Contains scientifically researched ingredients – CardioFlex™ Proprietary Blend with Amino Acids and Vitamins.
Capsule	Hard tablet or gelatin capsules that may contain sodium lauryl sulphate.	100% plant cellulose vegetarian capsules.
Result	Unknown.	Scientifically Tested.

### Instructions

**Directions of Use:**  
For adults, Take 2 capsules daily. Consume after meals.

**Storage:**  
Store in a cool and dry place. Once protection seal is opened, keep refrigerated and best consumed within 2 months. Keep out of reach of children.

**Precaution:**  
If you are taking medication or have a medical condition, you should consult your health care specialist prior to using this product.

Made in Singapore.

### FAQ

#### How soon will I be able to see results?

Results vary among individuals. You are suggested to take CardioCare™ consecutively for 3-6 months to achieve best results.

#### Will the long-term consumption of CardioCare™ result in any side effects?

No known side effect has been observed. All ingredients in CardioCare™ are tested and approved to ensure safety, purity, and efficacy. It is therefore safe for long-term consumption at the recommended dosage.

#### Should I separate my consumption of CardioCare™ from other medications or caffeine beverages?

Yes, because the acidity in medications and caffeine beverages may affect the efficacy of CardioCare™. You are advised to take CardioCare™ and your medications/caffeine beverages at an interval of 1-2 hours apart.
