The BSCG Certified Drug Free® for Equine Athletes program provides assurance that dietary supplements, natural products, nutrition/food items, cosmetics/creams, medical devices or related products, and/or ingredients or raw materials used in the manufacturing of such products, are free of performance enhancing drugs and/or other prescription, over-the-counter, or illicit substances that can lead to health concerns or positive drug tests for competition or companion animals. As part of the program, individual batches are tested for more than 1,300 substances including most of those on the “Association of Racing Commissioners International, Inc. Uniform Classification Guidelines for Foreign Substances” or on the “Equine Prohibited Substances List” as defined by the Federation Equine International (FEI). These prohibited substance lists, or a subset thereof, are used internationally for competition animals and include drugs banned by the American Graded Stakes Committee, FEI, USEF, greyhound racing, camel racing and other jurisdictions. This Batch Certification verifies that samples of the item identified by brand name, product name, and batch number below have been tested by ISO/IEC 17025 accredited instrumental screen using liquid chromatography/mass spectrometry (LC/MS) and that no compounds were detected according to the details and method detection levels in the BSCG Certified Drug Free® testing menu.
