

# Chroma Gel Advance Application

CHROMA  
GEL

## What You Need

- Chroma Gel Advanced
- Chroma Gel Finishing Touch
- Chroma Gel Acid Free Primer
- Chroma Gel Bonder
- Chroma Gel Cleanser
- Chroma Gel Antiseptic Spray
- Chroma Gel Oleum
- Chroma Gel size 4 Brush
- Chroma Gel File 80/80, 100/180
- Chroma Gel Buffer 300/300 & 100/180

## This is suitable for people who:

- have mid length - short nail
- like a high gloss, glass like finish
- like to maintain their nails

## This is not suitable for people who:

- have damaged nails
- are nail biters
- will not keep up maintenance

## Features & Benefits

- No drying time
- More strength & durability
- Unique colours created with nail polish
- Self levelling
- Lightweight and flexible
- UV & LED Curable

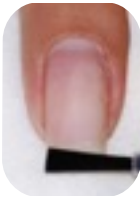

## Step 1 - Prepping for Chroma Gel Polish Mix

1. Buff the natural nail with the Chroma Gel 100/180 buffer.

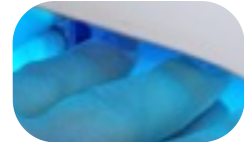

2. Remove all dust with the Chroma Gel antiseptic spray and paint a coat of Chroma Gel acid free primer to the nail.

3. Brush a thin coat of Chroma Gel bonder across the free edge.

4. Paint 1 even coat of Chroma Gel Advanced on the nail with the Chroma Gel size 4 brush, making sure to cap the free edge and cure:  
UV - 120 Seconds  
LED - 60 Seconds

5. Wipe off the sticky residue with a lint free wipe saturated in Chroma Gel gel cleanser.

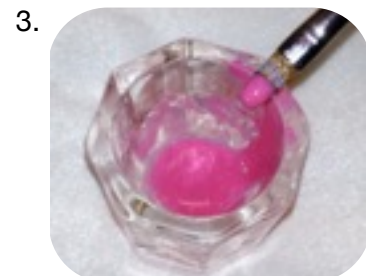

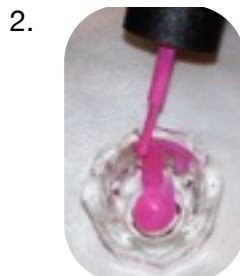

6. Buff the surface of the Chroma Gel Advanced gently with a Chroma Gel 300/300 buffer to remove the shine.

## Step 2 - Mix your polish with Chroma Gel Advanced

First Mix your Chroma Gel and Nail Polish/Varnish in a Dappen Dish.

Mixing Ratio - Depending on the size of your brush - 1 Part Chroma Gel, 2 Parts Polish .

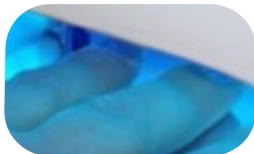

\*\* Top Tip (If your polish is light in colour mix 1 drop CG 3 drops Polish)

## Step 3 - Apply your mixture to the nail

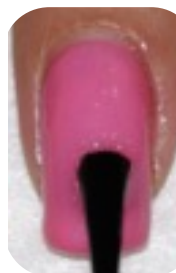

**1. Paint the 1st coat of Chroma Gel Advance mix on the nail and cure:**  
UV - 120 Seconds  
LED - 60 Seconds

**2. Paint the 2nd coat of Chroma Gel Advance mix over the 1st layer, cap the free edge and cure:**  
UV - 120 Seconds  
LED - 60 Seconds

**3. Apply 1 coat of Chroma Gel Advance without polish on the nail and cure:**  
UV - 120 Seconds  
LED - 60 Seconds

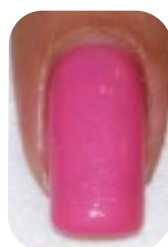

**4. Paint on the 1st coat of Chroma Gel finishing touch and cure. Repeat with a 2nd coat and cure.**  
UV - 120 Seconds  
LED - 60 Seconds

## Finally

**1. Wipe off the sticky residue with a lint free wipe saturated in Chroma Gel gel cleanser.**

**2. Apply Chroma Gel Oleum cuticle oil.**

## Removal

### **What You Need**

- Chroma Gel Oleum
- Chroma Gel Remover
- Chroma Gel File 80/80
- Chroma Gel Buffer 100/180
- 10 Lint free nail wipes
- 10 Foil pieces - cut into squares
- Orangewood stick

1. Use the Chroma Gel 80 grit nail file to gently file the surface of the finishing touch to break the seal and remove shine.

2. Saturate a cotton wool with acetone and apply to the top of the nail

3. Wrap in foil for 10 minutes.

4. Firmly pull the wraps off, one nail at a time with a twisting motion and start pushing the Chroma Gel off with an orangewood stick one nail at a time. If there is more product left on the nail re-wrap and allow the acetone to soak in to the product for a few more minutes.

- Remember :Use an orangewood stick to push and remove any excess Chroma Gel from the nail.

5. If you are not re-applying Chroma Gel, buff with the nail with a 300 grit buffer. Apply Chroma Gel Oleum to nourish and moisture.
