

CARDALE 868MHZ DC REMOTE CONTROL HANDSET PROGRAMMING GUIDE

SAFETY NOTICE:

Hand transmitters should only be used by persons who know how to operate the remote controlled door system. Always keep transmitters out of the reach of children.

STEP 1

LEARN CODING: This process is meant to transmit the code from an existing handset to a new handset. Connect both hand transmitters using the enclosed coding plug.

Note: Both side of the plug may be used identically.

STEP 2

Press and hold the button on the existing handset as shown. The LED on the handset will turn on.

STEP 3

Press and hold the same button on the new learning handset. After a few seconds the LED on the new handset will glow continuously. The new handset has now learned the code.

STEP 4

Remove the coding plug.

NOTE:

If you don't have a working hand transmitter, you will need to code the new handset following the method in the original user instruction manual for your operator model.
