

SureColor SC-F3000

The SC-F3000 is a robust direct-to-garment (DTG) printer that's designed for high productivity.

The SC-F3000 is a versatile DTG solution that enables users to quickly respond to incoming orders. It features high levels of accuracy and allows businesses to deliver quick turnaround times, while producing complex designs on a variety of light and dark cotton garments. This DTG printer also offers a low total cost of ownership (TCO) for mid/large garment and t-shirt production companies.

Enhanced productivity

To complement the intuitive, highly-durable design, Epson has introduced elements to keep businesses running more efficiently. The auto platen gap adjustment feature detects surface height and allows for easy switching between garments of different thicknesses. The 1.5-litre bulk ink solution makes reloading and resetting ink a quick and easy job. Also, Epson's Production Monitor software provides ongoing printer status information on smart devices and PCs; this along with two user-replaceable PrecisionCore MicroTFP printheads, help improve uptime.

Quality through innovation

Innovative technology helps to simplify production and increase quality levels. Ink droplet placement results in more stable and accurate printing and Nozzle Verification Technology (NVT) automatically checks whether all nozzles are firing accurately and intuitively compensates to ensure that high-quality printing is maintained.

Built for reliability

Various integrated auto-maintenance features, such as the new wiper kit, the larger dust catcher and auto cap cleaning, help to reduce manual intervention.

Eco-friendly printing

The inks meet the Global Organic Textile Standard (GOTS) and you're ensured that you can comply with the Oeko-Tex Standard 100 for high-standard safety ecological textiles¹.
