

STANDARD DESIGN FEATURES

Tall Filler Spout for Embalming Machine

The tall faucet is designed for your embalming machine to fit under the spout. By using the master mixing valve, you can supply the desired temperature to the tank of your machine. The spout can be easily turned around, out of the way when not in use.

Table Rinse

A serrated attachment is provided for quick connection of rinse hose. A constant flow of water can be supplied to the embalming table for cleaning or procedure purpose. The rinse is vacuum breaker protected for backflow prevention. Rinse Hose included.

Master Mixing Valves

Water temperature for the table rinse and tall faucet are easily controlled with the master mixing valves. Simply adjust lever until the desired temperature is achieved.

Hydro-Aspirator Assembly

A hydro-aspirator with built-in vacuum breaker prevents contamination of your water supply. The clear-sight drain also prevents contamination since the air gap will not allow aspirated material back into the aspirator assembly. A valve is provided to control water supply to the aspirator assembly. Includes 10 ft./3 m. aspirator hose, 5 in./12 cm. aspirator drain hose and 10 ft./3 m. spray hose.

Easy Installation

The entire unit is pre-assembled and pre-plumbed for easy installation. Simply drop into the cutout in your countertop and connect the utility lines. The base plate is fabricated of heavy gauge stainless steel. Will install incounters as shallow as 18 in./46 cm. in depth.

Specify Left or Right configuration. Tall filler spout designates side.

LW480 Aspirator

Deluxe hydro-aspirator with built-in vacuum breaker and control lever to be used to reverse the flow of water so as to direct it through the hose connections for either drawing fluid from the body cavity or rinsing a desired location. Fits most standard faucet threads. Fabricated from chrome plated brass.

LW481 Extension

The hydro-aspirator extension is fabricated from chrome plated brass. It provides further safety against polluted backflow.

LW482 Non-clogging Head

The Non-Clogging Aspirator Head prevents large debris from entering and clogging the system.

Aspirator Hose

Quality Clear Vinyl Tubing.

Order No. AHT

~Aspirator/Trocar tubing, ID: .375", OD 625" sold per 10 foot section.

Order No. AHS

~Splash tubing for Aspirator Drain, Embalming and Autopsy tops. AHS sold by the foot ID: 1", OD 1.25" (10 feet/3 meters minimum order).
