

# Elm A1 - Horizontal

Invoice No. K \_\_\_\_\_

## Tap hole specification form - Please fill out and return back to us

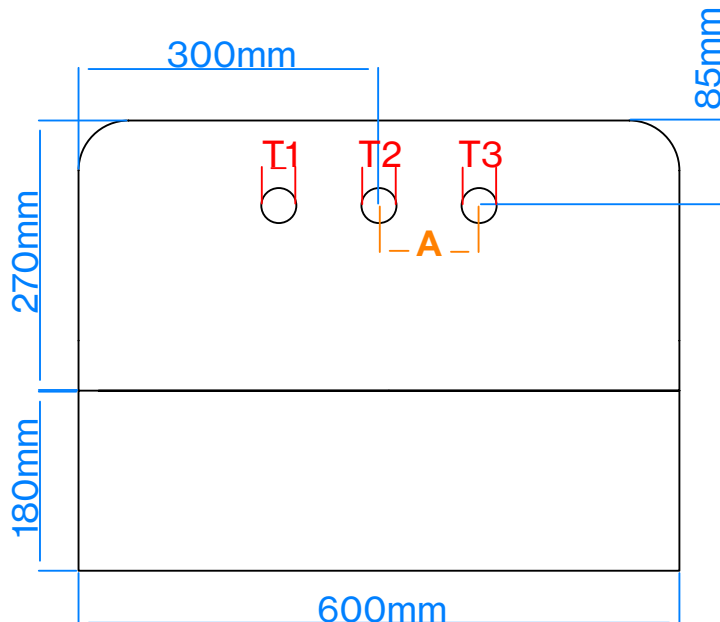

**Please Note:** All lead times commence upon return of this form, at which point the basin will be entered into our production schedules. Kast cannot be held liable for any delays caused by the late return of this tap form, it is the responsibility of the client to ensure a prompt return of the form when placing an order.

If you are unsure on required dimensions based on your tap specification, we advise contacting your tap/faucet supplier to ask for the holes sizes they recommend.

Due to the high volume of orders and variety of taps available, Kast are unable to complete this form on your behalf.

### Instructions:

- T1**, **T2** and **T3** are the hole sizes you require drilling. Please select your requirements from the available sizes only, or choose 'N/A' if no hole is required. Kast are only able to drill holes in these diameters, therefore please only choose from the available options. Please note our concrete will be between 20mm to 30mm thick.
- 'A'** is the distance between each hole (centre to centre). The maximum tap spread able to fit the Elm basin is 460mm - please choose a suitably fitting tap.

Location	Please select hole size required				
<b>T1</b> (Tap hole 1 - Diameter)	N/A 40mm	25mm 45mm	30mm 50mm	32mm 50mm	35mm 55mm
<b>T2</b> (Tap hole 2 - Diameter)	N/A 40mm	25mm 45mm	30mm 50mm	32mm 50mm	35mm 55mm
<b>T3</b> (Tap hole 3 - Diameter)	N/A 40mm	25mm 45mm	30mm 50mm	32mm 50mm	35mm 55mm
<b>A</b> (Distance between each hole centre to centre)	_____ mm (MAX 230mm)				

**Please Note: Once this form has been returned holes will be drilled as per the information supplied. Kast cannot be held responsible if the information provided on this form is incorrect. Unfortunately we would be unable to accommodate any changes once the basin has been produced.**
