help the planet | reduce single use waste | choose to reuse

MY ORDER CUP personalised re-usable cups & water bottles

RE-USABLE
ECO FRIENDLY

- In Australia around 2.7 million take away cups & over 1 million plastic water bottles are sent to landfill each day.

INSULATED
HOT/COLD

- By choosing to re-use you will be helping to reduce the excessive amount of single use plastic waste that currently pollutes our planet.

DURABLE
STAINLESS STEEL

- Double wall insulation keeps your drinks hotter/colder for longer, whilst the outer layer remains cool to touch & will not burn your hands no matter how hot you have your coffee!
- Our cups & water bottles are made from food grade stainless steel. They are tough & durable.

join the reuse revolution

help save our planet
one coffee or water bottle at a time!
