

Diversey™

CLAX® Oxy®

40C1

## Oxygen Bleach Powder

### Description

Clax® Oxy 40C1 is a laundry destainer specially formulated for use in commercial, healthcare and on-premise laundries. The product can be used for all types of fabric, except wool and nylon (polyamide), and should be applied in the main wash at temperatures between 70 and 90°C.

### Features

- Clax® Oxy 40C1 is a well stabilised powder laundry destainer, based on percarbonate, alkaline salts and bleach stabilising agents. Dissolution of percarbonate will lead to formation of hydrogen peroxide. The bleach stabilising agent and use according to instructions for use will result in minimal fabric damage and colour fading.
- Avoid contact of Clax® Oxy 40C1 with bloodstains during the initial phase of the wash (first 7 minutes) as bloodstains will set when in contact with peroxide and become difficult to remove. Fabrics with bloodstains should be pre-treated with enzymatic product in the pre-wash.

### Benefits

- Excellent destainer for all types of fabric, including coloureds.
- Results in minimal fabric damage when used according to user instructions

### Application areas

- Healthcare
- Lodging
- Government

Diversey™

CLAX® Oxy®

40C1

### Directions for use

1. Dose manually.
2. Dose into the main hot wash or following wash in a separate bleach bath following the hot wash.
3. Temperature range 70-80°C, pH 11-11.5.
4. Dosage: Light soil 1-2g/Kg, Medium soil 3-5g/Kg, Heavy soil 5-6g/Kg of dry goods.

### For soaking:

1. Dissolve powder in hot water.
2. Soak items for 10-30 minutes depending on staining and soil level.
3. Rinse with potable water at the end of the laundering process.

Note: Do not use Clax® Oxy 40C1 for cleaning wool and nylon (polyamide; e.g. HTN dust mats and microfibre).

In New Zealand: MPI Approved C33 (All animal product except dairy)
