

TEMPLATE Printed from website. Ensure you print to 100% scale, and double check dimensions

Cutout Dimensions

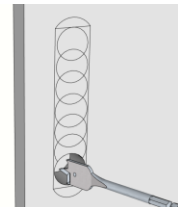

Instructions

- 1** Use the template to mark the cutouts on both sides of the door. The position back from the door edge and height from the floor, can be located according to your preference.

- 2** Drill out the cutout. This can be achieved by drilling a series of holes around the line you have drawn, then using a chisel to finish the hole, or by using a 30mm drill bit and drilling a series of overlapping holes.

- 3** Insert both sides of the flush pull into the cutout and use the 2 screws provided to fix the flush pulls to each other.
