

LASH-V™ LASH LIFT PROCEDURE

IMPORTANT INFORMATION:

- Per sachet, you can usually treat between 3 - 4 customers
- Gently massage sachets prior to opening.
- Once open, use within 24 hours (or 7 days for patch testing) if sealed immediately with micropore tape and stored in an airtight container after every use.
- Please perform a patch test before treatment.

PROCEDURE

- The treatment time varies depending on the individual client's lashes.
- Position client comfortably.
- Take a before photograph if required.
- Protect client's hair with headband and drape a towel over your client's upper body to protect clothing.
- Sanitise your hands.
- Remove any traces of make up using LASH V's Remover and a clean cotton pad.
- Comb through the lashes using a disposable mascara wand, put the mascara wand to the side for later in the treatment.
- Place a Lash V collagen gel pad under each eye ensuring client's bottom lashes are secured under them.
- Choose the appropriate shields, trimming to fit as required. Apply Lash & Brow Adhesive to shields and glue to eye lids.
- **Using Lash V Lash & Brow Adhesive:** apply adhesive to the shield in sections. Use either lash tool or Y-Comb to gently lift the lashes from the root and attach them to the shield. Gradually move along the shield section by section until all lashes are adhered to the shields.
- **Using Lash V Lami Lift Balm:** apply balm to silicone brush and gently lift the lashes from the root and attach them to the shields. Lashes should instantly lock into place and bond to the shield. Then run your Y comb through the lashes to isolate and perfect your placement.

STEP 1

Apply step 1 with a micro-applicator or brush. Apply as close to the lash line as possible to make sure the lashes are lifted from the root. Apply solution 50% up the lashes, staying away from the tips! Do not apply near the tips as this will over curl the lashes.

PROCESSING TIME:

- **Very fine to fine : 4-5 minutes.**
- **Natural: 5-6 minutes.**
- **Very thick: 6-8 minutes.**

Remove using a clean ear bud using the rolling technique ensuring solution does not touch the tips.

STEP 2

Repeat step 1 with the neutralising lotion, as close to the lash line as possible and 50% up the lashes.

PROCESSING TIME:

- **Very fine to fine : 4-5 minutes.**
- **Natural: 5-6 minutes.**
- **Very thick: 6-8 minutes.**

Remove using a clean micro-applicator.

OPTIONAL COLOUR BOOST:

- Prepare chosen colour of Lash V Brow & Lash Dye or favourite tint and apply using brush. Remove dye after 3-5 minutes using a clean cotton bud.

STEP 3

- Apply Moisturising Serum over the lashes, those will begin to gently release the lashes from the shield.
- Apply Moisturising Serum to the eyelid under the lash shield, gently releasing the shield from the eye.
- Use a clean cotton bud to remove excess serum from the eyelid.
- Customer can leave Moisturising Serum on for the next 24- 48 hours and should avoid water and make up.
- Take an after photograph if required.
- Explain aftercare to your client and give them a printed copy to take away along with a mascara wand.

LASH-V™ BROW LAMINATION PROCEDURE

IMPORTANT INFORMATION:

- Per sachet, you can usually treat between 3-4 clients.
- Gently massage sachets prior to opening.
- Once open, use within 24 hours (or 7 days for patch testing) if sealed immediately with micropore tape and stored in an airtight container after every use.
- Please perform a patch test before treatment.
- **Please refrain from use of water and cling wrap.**

PROCEDURE

- The treatment time varies depending on the individual client's brow density.
- Complete client's consultation sheet.
- Position client comfortably.
- Sanitise your hands.
- Take a before photograph.
- Remove any traces of make up using an oil free make up remover and a clean cotton pad, then place in the bin when completed.
- Comb through brows using a mascara wand. Put the mascara wand to the side for later in the treatment.
- Apply either Lash V Lash & Brow adhesive or Lash V Lami Lift balm to brow.
- **If you are using Lash V Lami Lift balm**, apply a good amount with a silicone brush in an upward motion. Brow hairs will instantly lift and lock into place. Use Y comb to brush the brow hairs into desired shape.
- **If you are using Lash V Lash & Brow Adhesive**, apply adhesive section by section. Start at the front of the brow, apply the adhesive and allow it to sit for 30 seconds until it becomes tacky. Then use your Y comb to lift the brow hairs up into desired shape. Once happy with your shape, move onto the next section.

BROW STAIN, DYE OR TINT CAUTION:

When applying Stain, Dye or Tint, be mindful the brow tint process time is a lot faster as it develops a lot quicker (up to half the time).

STEP 1

- Using a tool of your choice (micro-applicator, cotton bud, lip applicator) apply a generous amount of step 1 to the brows. Make sure to work this into the brow hairs to make sure of even distribution. Wipe off any excess from the skin around the brows.

PROCESSING TIME:

- **Very fine to fine brows: 4-5 minutes.**
- **Natural brows: 5-6 minutes**
- **thick to very thick brows: 6-8 minutes.**

Remove using a clean cotton bud, place used cotton bud in the bin.

STEP 2

Using a tool of your choice (micro-applicator, cotton bud, lip applicator) apply a generous amount of Step 2 to the brows. Make sure to work this into the brow hairs to make sure of even distribution. Wipe off any excess from the skin around the brows.

PROCESSING TIME:

- **Very fine to fine brows: 4-5 minutes.**
- **Natural brows: 5-6 minutes**
- **thick to very thick brows: 6-8 minutes.**

Remove using a clean cotton bud, then place the cotton bud in the bin.

Comb brow carefully with a brow lamination brush, into your desired shape.

OPTIONAL COLOUR BOOST:

- Prepare chosen colour of Lash V Stain or Brow & Lash Dye and apply using brush. Remove dye after 3-5 minutes using a clean cotton bud. For Stains or tints, refer to package instructions.

STEP 3

- Apply Moisturising Serum over the brows and style accordingly.
- Customer can leave Moisturising Serum on for 24-48 hours and avoid using water and makeup.
- Lash V brow growth serum is perfect to prevent dryness of hairs, premature fallout and keeps brows healthy.
- Take an after photograph if required.
- Explain aftercare to client and give them a printed copy to take away along with a mascara wand.
