

# Locket Guide

As you can see, these lockets are quite small and may take some patience and craftiness to get just right.

You got this.

\* Before cutting out templates, check that the guide has printed at 100% scale by laying a credit card on this line.

## LOCKET PHOTOS

### Get started.

1. Print this guide at 100% to make sure everything is scaled just right.
2. Cut out the shape of your locket. (Template pictured right)
3. Place it over your photo and trace around with a pencil (not pen!). We recommend photos printed on anything but glossy photo paper as it's difficult to work with at this scale.
4. Cut out your photo by following the inside of the line you traced. Erase pencil marks when you're finished.
5. Use something pointy like the end of a paper clip or tweezers to help tuck the edges into the locket. And voila!

## ALTERNATE IDEA

### Keep a sentiment close to your heart.

Locketts don't have to hold photos.

Try writing a note, quote, loving reminder-to-self on a small piece of paper, fold it up and tuck it in the locket.
