

Ring Size Guide

Before sizing, check that the guide has printed at 100% scale by laying a credit card on the line or the correct coin on one of the labeled ring sizes.

OPTION 1

Measure a ring

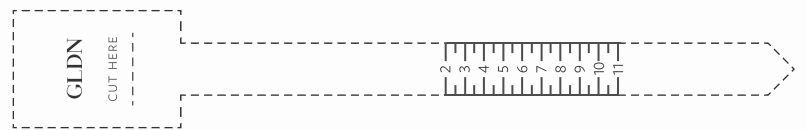

Place your ring over a circle to get an idea of size. You should only see the white circle inside your ring. If your ideal fit falls between two sizes, size up.

OPTION 2

Measure your finger

Cut out the ruler, and make a horizontal slit at GLDN logo. Measure by wrapping the ruler around where the finger you're sizing, pulling the end through the slit. Make sure the measurement accounts for slipping over your knuckle!

Ring size may also vary slightly depending on style of the ring.
