CORE FEATURES

Intuitive folding lock

A simple and effective pull-and-snap locking design provides single action instant folding and unfolding.

Front wheel holder

Smart front wheel storage design is intuitive, simple, looks good and saves space.

Suspension adjustment

Front suspension is easily adjusted. Rings can be added to rear suspension to increase or decrease travel.

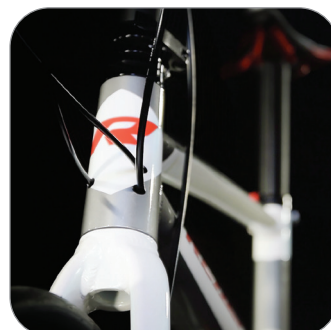

New front fork design

Revolutionary Trailing Link suspension design with disc brake system and 4-bar linkage anti-dive performance.

Front and rear discs

Full disc brakes now come standard on every REACH, providing serious stopping power whatever the weather.

Internal cable routing

No mess of cables to ruin the look of the bike, everything is thoughtfully run inside the frame and out of the way.
