

CERTIFICATE OF ANALYSIS

Product Name	Trametigluce
Product ID	T55061
Structure	 <p>The chemical structure of Trametigluce is a complex heterocyclic molecule. It features a central pyrimidine ring system with several substituents: a methyl group (CH₃) at the 2-position, a methylamino group (NHCH₃) at the 4-position, and a 4-fluoro-3-iodophenylamino group (NH-C₆H₃(F)(I)) at the 6-position. Attached to the 2-position of the pyrimidine ring is a 1,3,5-triazin-2(1H)-one ring, which is further substituted with a methylamino group (NHCH₃) at the 4-position and a cyclopropylamino group (NH-C₃H₅) at the 6-position. A benzamide group (NH-C₆H₅) is attached to the 4-position of the triazinone ring. The benzamide group is linked to a methanesulfonyl group (SO₂CH₃).</p>
Analytical Test Results:	
Lot#:	46057
Appearance:	White Solid
Purity (HPLC):	95%
Test Date:	1/30/2024
Final QC	Passed
Storage Condition:	Refrigerated.
Notes:	For Research Use Only.
