

Product Name:

HaloTag Biotin Ligand

Catalog Number:

T01225

Description:

HaloTag is a self-labeling protein derived from the haloalkane dehalogenase DhaA from *Rhodococcus rhodochrous*. Its active site reacts with chloroalkane substrates to form an irreversible bond. The covalent linkage between the HaloTag ligand and HaloTag protein enables rapid isolation and purification. HaloTag Biotin Ligand can be used for protein biotinylation.

Physical and Chemical Properties:

Molecular Formula: C₂₀H₃₆CIN₃O₄S

Molecular Weight: 450.04

Physical Appearance: White Solid

Purity: ≥95%

Optical Properties:

Abs/Em Maxima: n/a.

Solubility:

DMSO, DMF

Storage:

Store at -20°C and protected from light.

Shelf Life:

12 months after the date of delivery.
