SKINPEN PRECISION MICRO NEEDLING COLLAGEN STIMULATION THERAPY™

Collagen Stimulation Therapy™ (Micro Needling / Dermaroller) is as close as you can get to having facial surgery to reduce lines, wrinkles, scarring and sagging skin – without going under the knife

CST is a cutting-edge treatment that harnesses your body's natural powers of healing to tighten skin and achieve incredible results. It is especially effective for addressing the visible signs of ageing, as well as sun damage, scarring, slackened skin, stretch marks, uneven skin tone and dilated blood vessels. The treatment can be done on all areas of the face and body and is suitable for all skin types.

HOW COLLAGEN STIMULATION THERAPY™ WORKS

During CST, a painless revolutionary procedure, your medical skincare professional will apply a topical anaesthetic and will use a small instrument containing tiny needles to create thousands of microscopic channels in the lower levels of your skin. This causes microscopic trauma to the skin. The body responds to this the same way it would to an injury and starts to repair the skin, resulting in increased collagen and elastin production.

Applying Environ creams containing vitamins A and C before and after treatment greatly enhances the results, because Collagen Stimulation Therapy™ sets up growth 'factories' in your skin. The vitamins can be pictured as the workers in these factories and they will continue to benefit your skin for months after the treatment.

- Incredible results without the need for invasive surgery
- Completely natural, uses the skin's own powers of rejuvenation
- Not painful – a topical anaesthetic is used
- Short healing time, in most cases clients are able to go to work the next day
- Does not damage the skin, unlike some other procedures
- Can be done on all areas of the face and body
- Does not cause sun sensitivity
- Lasting effects – collagen continues to be laid down in the months following treatment

SKINPEN COLLAGEN STIMULATION THERAPY™

Treatments are carried out by our highly qualified Therapist. Consultations are free of charge with no obligation. By appointment only.

Between one and six treatments are required to achieve maximum results. A full consultation and preparation with topical vitamin A is required prior to your first treatment.

HIFU MACHINE

WE RECOMMEND A FULL CONSULTATION BEFORE TREATMENT £395

HIFU stands for 'High Intensity Focused Ultrasound'. This treatment can target various depths of the body's tissue for skin tightening, skin lifting and body contouring. Entirely non-invasive, HIFU machines work by targeting deep layers in the skin – it boosts new collagen production and collagen regeneration right at the source. HIFU is known as the 'Lunchtime Face Lift' as the treatment is quick, very tolerable and has no downtime. Many high profile clinics and top aesthetics doctors offer HIFU as the treatment targets the upper dermis 1.5mm, lower dermis 3.00mm and most importantly the SMAS at 4.5mm.

The SMAS is the layer that sits between your muscle and your fat layer. This SMAS layer is the actual area a plastic surgeon would pull and tighten under a surgical operation using a knife. HIFU targets this layer without any surgical incisions, giving the patient a no-downtime facelift. Which means you can gain excellent results without any risks associated with surgery, such as infection, scarring, swelling etc. Treatments are fast and results can be seen immediately for some patients, depending on the level of laxity your skin has.
