Important steps to assure the most accurate measurement

1. Before printing the ring sizing guide, make sure that page scaling is set to «NONE» in your printer settings area.
2. Once it's printed, measure the line on the left to ensure it is exactly 2 inches or 5.08 cm. Alternatively, if you don't have a ruler, you can place your credit card on the guide and check if it fits.
3. If the measurements aren't accurate, please review your print settings again. Be sure you are printing full size.

Method 1 - Paper Sizer

1. Carefully cut out the paper sizer below. Be sure to make a small slit in the end for the ruler to slide through.
2. Wrap the sizer around your finger with the numbers facing out and slide the rounded end through the slit.
3. For an accurate measurement, pull the sizer tight over the widest part of your finger. This could be a knuckle.
4. Read the number that lines up next to slit. This is your ring size. Use our ring size chart to convert it to EU or UK size.

Tips for accurate measurements

- * Measure your finger later in the day when it is at its largest
- * Avoid measuring your finger when it's cold, which are at their smallest

Method 2 - Measure an Existing Ring

1. Choose a ring that fits the desired finger.
2. Place the ring over the circles below. Match the inside edge of the ring with the closest circle. This is the inside diameter of the ring.
3. If the ring falls between two sizes, select the larger of the two.
