AUTOSAT digital

The AutoSat 2S **85cm** weighs approx. 15 Kg.
The height is approx. **22cm** when parked.

AutoSat 2S Twin LNB Height 22 cm

Autosat 2S Control

The system offers the user full flexibility when choosing a satellite receiver box. The control unit is totally independent from the receiver box when searching for the desired satellite. Another great feature is the very low **Power consumption** of the system. The control box powers off after the satellite has been found. There is no power consumed by the AutoSat during reception.

GPS option available

Operating the AutoSat is incredibly easy. Just press the on button and the AutoSat 2S will automatically search for the last found satellite. The LCD display will inform you about the status of the search process and the signal strength after the Satellite has been found.

Time has proven us right. Even the first AutoSat systems are working reliably today. The ultra heavy duty gear box guarantees reliability as well as excellent wind stability. The specially designed strengthening elements achieve light weight with high frame stability. Only non corrosive materials are used to maximise durability. There are no electronic components used in the outside unit of the system. The complete system is designed and manufactured in

warranty is another sign that the AutoSat 2S is a high quality product.

Automatic Skew Motion - Twin LNB

The angle of the Satellite signal varies depending on your geographical position, therefore the LNB needs to be aligned to maximum signal. The motorised Automatic Skew of the AutoSat 2S will take care of the adjustment. The skew angle of the LNB will be aligned automatically every time a Satellite has been found. The Australian 10.7 TWIN - LNB allows multiple receivers to be connected simultaneously to the AutoSat 2S. This will enable to watch or record different channels at the same time.

VAST 12V Satellite Receiver

PVR ready

Foxtel & Vast Compatible

Any Satellite Receiver Box can be used with the AutoSat 2S Control Satellite System.
