

## ORDERING PRE-BONSAI FROM THE USA

The process is easy and straightforward!

### Step 1: Acquisition of Information

Contact your local USDA office (there are normally multiple offices per state), and ask them two questions:

- 1 – Are the species that you're interested in permitted to enter your state from Canada?
- 2 - What are the import requirements for each of those species?

### Step 2: Inspection

In most cases a simple phytosanitary certificate is all that is required. Here is how we get one for your order:

- 1 – You tell me what your local USDA office wants the plant(s) inspected for.
- 2 - I get a local agent here in Canada to inspect the tree(s) and produce the phytosanitary certificate

### Step 3: Shipment

I package and send the tree(s) to you. This process is entirely custom, and we will make adjustments based on the time of year and the needs of the tree(s)

### Conditions:

**The minimum purchase is \$2000 USD** because international shipments require time, research, and coordination that is hard to justify in the case of smaller orders. Most requests come from professionals, societies, clubs and study groups, but I have shipped to individual hobbyists as well.

**Plants are shipped once per year (February/March).** All orders for 2023 have already been shipped. Now taking orders for 2024.
