

CLASSIC RCC-CARBON

PRESENTATION: The classic RCC-CARBON rollerskis are perfect for high level competition.

PRODUCT SPECIFICATIONS

- Their low-profile format allows you to feel like you are skiing on snow.
- The carbon frame guarantees an unmatched lightness and a very good rigidity for a better transmission of energy to the rollerski.
- The length of the frame and the low ground clearance ensure high stability of the rollerski trajectory and reduce vibrations.
- The propulsion is provided by the anti-rollback system integrated in the front wheel.

TECHNICAL CHARACTERISTICS

Frame :	Carbon
Forks :	Aluminium 7075
Wheels :	PU 76 35, 3" x 1" 9/16 inch (73x43mm)
Bearings :	ABEC 9 Waterproof
Bindings :	To choose
Mass : (One ski with wheels and binding) :	1105g
Length :	27" 9/16 inch (700mm) Axle to axle
Ground clearance :	1" 1/8 inch (29mm)
User weight limit :	150 kg

Available bindings:

- SNS (Profil / Pilot), standard bindings from Amer sport
- NNN, standard bindings from Rottefella

Please note: SNS and NNN are different binding standards. It is your responsibility to choose the correct ski boots for your choice of binding.
