# Warranty

---

Illuminance products "come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure".

Illuminance products are warranted in Australia when installed by a licenced electrician. Products utilising replaceable bulbs are warranted for a period of 12 months (warranty does not cover replaceable bulbs) and those utilising dedicated LED's are warranted for a period of 2 years. This warranty is not transferable and proof of purchase as well as proof of installation by a licenced electrician will be required when claiming warranty. To the maximum extent permitted by law, any replaced or repaired products by Illuminance are covered only by the balance of the warranty period remaining from the date of purchase of the original Illuminance product. Warranty does not cover loss or damage caused by wear and tear, misuse, incorrect installation, failure to clean and maintain, incorrect voltage, exposure to heat, corrosion, insect and or vermin infestation. The cost of repairs and/or service call arising from incorrect installation, not due to faulty material or workmanship in accordance with the Illuminance warranty, will be payable by the purchaser at the time of repair. Illuminance products presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may also be used to repair the goods. Any service request must be arranged with Illuminance and approved before calling your own electrician. Reimbursements will not be made for call- out fees or other costs without prior approval in writing from Illuminance. In the circumstances where an emergency has arisen out of normal business hours and Illuminance cannot be contacted, Illuminance will reimburse customers their reasonable costs (as determined by Illuminance) for using their own electrician. This product is not designed or intended for industrial or commercial use.
