We want to thank you for choosing us. We are committed to making sure you are happy with your purchase, so we would love to hear your experience with your new product!

Please give us a chance to make it right before you leave negative feedback. If you are not satisfied with your experience, we will do whatever needs to be done to make it right. Please visit our website for assembly guide, product maintenance, product support, replacement parts, and any other questions or concerns.

If you are missing a piece or there is shipping damage, need instructions or require help with other issues, please reach out to our customer care team by e-mailing us at support@motopro.freshdesk.com.

If you have any question, please send us a video no less than 30 seconds showing the problem so that we can forward it to the manufacturer for tech support. We would also like to offer an additional 1 month warranty after receiving your video.

You can email us the video at support@motopro.freshdesk.com.

Your engagement and support are our greatest motivation to provide the best customer service possible. We highly appreciate your cooperation. Hope you have a pleasant shopping experience.

Please register your warranty service by visiting our official website directly or scan the QR code below by mobile phone. Thank you and we are always here to help you!

Upon receiving your vehicle (and after reviewing the video) we recommend that you heed the following tips:

Tip 1

Perform your first **oil change** by replacing the Engine oil with 10W40 motor oil prior to starting. Always remember to check the oil level on your dipstick after adding new oil to see if the oil is at the right level. It is better to use fresh unleaded gasoline. If your vehicle has been unused for an extended period of time, remember to replace the gasoline before use.

Tip 2

Always remember to check and **tighten your bolts** before you ride for safety. You can also use a little Loctite Threadlocker to reinforce the loose screw.

Tip 3

Make sure **ignition key** is turned to the ON position. If the ignition key is in the OFF position, the unit will not start.

Tip 4

Make sure the **fuel valve** under the fuel tank is in the ON position. If it is in the OFF position, there will be no gas flow and the unit will not start.

Tip 5

When you want to **shift gear**, you need to hold the clutch lever and DO NOT twist the throttle grip to accelerate, the gear setting is **N-1-2-3-4**. Move the shift lever up to upshift and down to downshift. You will need to have some skill to properly gear shift, this may take practicing several times.

Tip 6

Always make sure the front and rear chain sprockets are on a straight line. And then adjust your **chain** to proper tension if necessary. After the bike is used for a period of time, check whether the chain is too dirty and lack of lubricating oil. If so, please clean and add special **lubricating oil** in time.

If you have any questions or issues, just feel free to contact us, we are always here to help. Thank you!
