

Marmorino Palladino Maintenance Guide

Marmorino Palladino is designed and manufactured in Los Angeles by MEODED Paint and Plaster Finishes. It is an interior and exterior decorative wall plaster. Palladino produces authentic, Italian textures because it has a thicker body formed by its medium size grain. These textures enhance the look and feel of any location that needs a warm and dramatic appearance.

The main ingredient in Marmorino Palladino plaster, Pure Slaked Lime contributes to the high quality luster and appearance of the finish. It also helps make the finish breathable and moisture-resistant.

Cleaning:

Use a dry cloth to remove dust and loose dirt from surfaces, then wipe them with a clean damp cloth as needed. Mild detergents or proprietary cleaning agents may also be used. Scrub gently or use a low-pressure water stream if necessary. Solvents such as acetone or mineral spirits can also be used, provided proper safety procedures are observed. Clean vertical surfaces moving upward from the bottom. Use a damp rag followed by a dry rag to remove any remaining cleaning agents. Find a small, inconspicuous portion of the surface to test cleaning products and methods before applying them to a wider area. Follow the manufacturer's package label instructions.

Blemishes:

Some scuff marks, scratches and stains that resist normal cleaning techniques may respond to light sanding with 1000-grit sandpaper or the finest grade steel wool. Find a small, inconspicuous portion of the surface to test these techniques. Reapply sealer and/or wax to sanded areas as necessary.

Repairs:

The application style of Marmorino Palladino makes it easy to blend-in repairs. By having regular maintenance by our company, or one of our recommend applicators we can keep your walls always in good condition and longer lasting.

If you have any questions please do not hesitate, in the meantime we hope this information will be useful for the general maintenance of your new and beautiful wall.
