- Quick-Growing
- Year-Round Herbs & Veggies Supply

Features

Adapter Input: 100-240VAC, 50/60Hz
Adapter Output: 12VDC 2.0A

Hydroponic System Instructions

WARRANTY PERIOD AND CONDITIONS

We devote special attention to selecting high-quality materials and use manufacturing techniques that enable us to create designer and durable product ranges.

The warranty covers product breakdowns and malfunctions under the condition that the product is used in accordance with its intended use and subject to installation and maintenance in accordance with good practice and the information contained in the user's manual.

This contractual warranty does not cover defects and damage caused by the natural wear and tear of parts, bad weather, flooding, heat releases, freezing, damage caused by water quality (hardness, aggressiveness, corrosion, etc.), by the presence of foreign bodies transported by water or otherwise (sand, filings, etc.) or the lack of room ventilation, and damages that could be the consequence of improper use, misuse, negligence, accident or maintenance that is defective or does not comply with good practice or the information in the user's manual.

The following are also excluded from the warranty: harmful consequences due to the use of accessories and/or non-original equipment manufacturer or improper replacement parts, disassembly or product modification.

SAFETY

These instructions are for your safety. Please read through them thoroughly prior to installation and retain them for future reference.

It is recommended to have a regular schedule of care and maintenance to keep the surface condition well.

Package Including

Hydroponics Garden Kit

A+B Plant Food

6PCS Pots Kit & Grow Domes

DC 12V 2A Output Adapter

5 EASY STEPS

To Get Your Garden Up

Make sure that pump cord is plugged in. Then plug in the power cord adapter.

Add water and plant food through the feeding window.

Place seed pods into the bowl.

Press and hold the "☀" button 5 seconds to start your hydroponic system.

NEXT: Planting Your Garden

Before planting, please press the "☀" button for 5 sec.

"☀" Setting is a quick setup path to starting a new garden.

LED timer pump will be reset once you press it for 5 sec.

1. Watering

-Add water through the feeding window.

-It's okay to add water at any time. Keep the water topped up for quick growing.

-It's better to use RO water than Tap water.

-Your pump cycle is set to be ON for 5 minutes and OFF for 25 minutes.

2. Add Nutrients

-Fill the bottle containing the solid nutrients with RO water and shake the bottle to fully mix the content.

-Add 5 ML of both A and B nutrients each in 1L of RO water to prepare the final solution.

3. Growing Lights

-Hydroponic system has a built-in lighting timer. Once you set up, it will automatically turn on and off everyday.

- Mode A: ON for 12 hours and OFF for 12 hours everyday.

- Mode B: ON for 14 hours and OFF for 10 hours everyday.

- Mode C: ON for 16 hours and OFF for 8 hours everyday.

-If you want to change the timings of the lights, simply press the "☀" button for 5 sec and your grow lights will turn on at this time.

4. Note

-Please do not use any other growing medium like cocoa peat, soil, coco coir, etc

- If you're growing leafy greens, then remove the grow cubes after the plant fully matures (4-6 months) and use new one to grow again.
