

FNG

EXTREME LED SERIES

THE NEXT GENERATION OF LIGHTING

The FNG series combines power, intensity and style in a redesigned compact build. Level up your driving experience with advanced optics, controlled beam patterns, and intense brightness.

The FNG series is crafted to provide the brightness you need to light the trails and highways ahead.

FEATURES

TIR OPTIC TECHNOLOGY

The TIR (Total Internal Reflection) is an internal lens within the light housing. It captures and emits more light directly from the LED chip than your traditional light housing (such as a parabolic reflector).

HIGH INTENSITY OSRAM LEDs

The FNG series packs a serious punch. Each circuit board is composed of 4 5W high intensity Osram LED chips.
