

Grip bands take about 5 minutes to install. They're very snug, so it's a bit of a pain in the ass, but once they're on, they stay on and feel great.

UNLOAD PISTOL PRIOR TO INSTALL.

1. Stretch the band onto the grip.

2. From the inside of the band, pull sideways and shove down.

3. Repeat on the other side of the grip.

4. Now alternate between pushing and pulling the band onto the grip.

5. Continue until grip is fully covered.

6. Trim the excess rubber off with the razor, flush with the magwell.

7. Once you're done, wipe the grip with a damp cloth. This will give it a nice feel. Enjoy!
