

Sterile split dressings

Unique fenestration makes application easier around drain tubes and IVs

SORBEX™ sterile absorbent split dressings

This multi-layer, highly absorbent dressing is made for patients with heavier draining wounds. It also helps save nursing time by reducing the frequency of dressing changes.

- Non-adherent outer layer does not stick to wounds or cause trauma to wound sites during dressing changes
- Thick fluff absorbs fluid and provides cushioning to protect the wound
- Cellulose sheets wick away and absorb fluid
- Hydrophobic layer prevents strike through; blue backside makes proper placement intuitive
- Consolidates SKUs by replacing non-adherent dressing, gauze and ABD pads.

NONEX0023F

Fenestration makes application easier around drain tube

Item No.	Description	Pkg.
NONEX0023F*	2" x 3" sterile absorbent dressings with slit	50/cs

Sterile nonwoven gauze drain and IV sponges

- Unique fenestration makes application easier, resists puckering, and enables the sponge to lie flat when wrapped around a drainage tube or IV tube
- 6-ply rayon/polyester blend is highly absorbent, low-linting and fast wicking
- Non-adherent material does not stick to wounds, minimizing trauma upon removal or dressing changes
- Precut to save time and eliminate the need for sterile scissors
- Drain not included

PRM256000

Drainage sponge lies flat when wrapped around a drainage tube

Premium
