

# THE FOUR EASY STEPS

to designing your living room upholstery

# 1

## FORMAT

The first step is deciding how you would like the room layout to come together. How you will use the space, who will be using the space and the room dimensions and doorways will help make the room format decision.

## FRAME

# 2

The second step of selecting your 'Frames' as we call it in the furniture industry is by selecting the comfort and style that best fits you and your home. We will help you use the room format to pick great pieces to fulfill the room format choices made in Step 1.

# 3

## FABRIC

Step 3 is all about selecting the right material to cover the chairs, sectional, sofa, or other soft seating for the room. Performance fabrics, top grain leathers, neutrals or patterns are the exciting choices made in this third step!

## FINISHES

# 4

Step 4 is about the pulling together the final details. This can be accent pillows, leg stains, nail head trim additions, and other customizable details to finish the room. We are here to help you tie the room together and create a curated look together in step 4!
