

AC-LGD 60™
OHMS

AudioControl®
Making Good Sound Great™

**LOAD GENERATING DEVICE & SIGNAL STABILIZER
FOR OEM SOUND SYSTEMS REQUIRING A SPEAKER LOAD**

PROVIDES STABILITY TO PREMIUM AMPLIFIED OEM SOUND SYSTEMS
IDEAL FOR PREMIUM AMPLIFIED DODGE®, CHRYSLER®, JEEP®, MASERATI®
MAXIMUM INPUT 25 VRMS (150 WATTS)

FACTORY UPGRADE ACCESSORY

AC-LGD 60™ 60 OHMS

LOAD GENERATING DEVICE & SIGNAL STABILIZER FOR OEM SOUND SYSTEMS REQUIRING A SPEAKER LOAD

What is a Load Generating Device?

Today's factory amplifiers feature built in protection circuits which can mute some or all audio outputs when the factory speakers are removed. The AC-LGD 60 has been designed to generate load and stabilize signal from amplified factory systems to ensure the best possible audio.

Quick Start:

1. Remove one speaker level input plug from your AudioControl active line output converter (LOC), processor, or amplifier
2. Unplug one end of AC-LGD 60 then plug the AC-LGD 60 into the LOC
3. Install the plug you removed from the LOC to the open end of the AC-LGD 60
4. Connect your factory speaker signals to the AC-LGD 60
5. If you are using a LOC with different style connectors, unscrew the connectors from the AC-LGD 60 wires and connect the wires accordingly

Important

- ➔ Do not exceed **25 Wrms** (150 watts) of input
- ➔ Operating Impedance: 60 Ohms
- ➔ Do not install under carpet or near heat sources

What's Included?

One pair of AC-LGD 60s prewired with EIA color coded wires

AC-LGD Quick Reference Guide

AudioControl LGD's install in-between the factory signal source & the aftermarket equipment's inputs, making them simple to install, and an inexpensive way to ensure your OE integration installation performs the way it should!

AC-LGD60 for 2018+ vehicles
WITH AMPLIFIED OEM systems

AC-LGD for 2005-2015 vehicles
ALL MAKES/MODELS

AC-LGD20 for 2018+ vehicles
W/O AMPLIFIED OEM systems

Common examples of vehicles that benefit from LGD's:

- Toyota
- Dodge/Ram
- Honda
- Ford
- Chrysler
- Alfa Romeo
- Fiat
- Harley-Davidson
- Jeep
- Subaru with STARLINK
- GM
- Maserati

Today's factory sound systems include more Class D amplifier technology which can mute, distort or emit damaging frequencies to your new aftermarket audio equipment when the factory system no longer senses an impedance load present on its outputs. Using carefully selected resistors and a Zobel Network (AC-LGD), the AC-LGD series has been designed to generate load and stabilize signal from the factory system to ensure the best possible audio.
