Brewing Alcohol, Water

Category: Plum wine

ABV: 10.0%

Volume:
300ml (12bottles/case)

The Way to Drink

Chilled

On the
Rocks

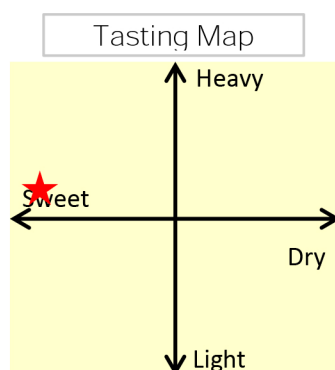

● Characteristics

- Brewed using with premium plum produced in Aodani, Kyoto
- Sake based plum wine: available to sell by soft liquor licence
- Compared with hard liquor based one, this is more mild, smooth and light taste

● "Aodani" plums

Aodani is one of the most famous area of producing plums. Typically harvest season of plums is May, but the plums in this area are harvested at the end of June as it takes more time to grow.

We purchase selected plums from them and wash one by one carefully, then soak them into our original sake.

● Food Parings

Of course suit for drinking with club soda or milk, but try with cheese, especially Mozzarella. Its creamy and mild texture match up with plum very well.
