

Introducing the NEW
DOVE® AERO HVE
SALIVA EJECTOR

Control aerosols without
compromising comfort

It's Time We Cleared the Air

The new DOVE® AERO HVE helps dental professionals by:

- ✓ Providing HVE power with saliva ejector comfort
- ✓ Allowing the use of traditional instrumentation
- ✓ Preventing complicated working positions
- ✓ Eliminating the use of large vacuums or patient-gagging gadgets

Pictured: R2041-3

Also available for R2041-1 and R2041-2

Sold in quantities of 100 and 1,000

Made in the USA

External aerosol evacuation up to 95%

Features a patent-pending external aerosol chamber utilizing the airflow from the HVE to effectively manage aerosol

Single-use for increased patient safety

Helps prevent cross-contamination between patients through use of a new, disposable valve for every patient

Backflow is removed

Originally designed in our DOVE SE Standard Valve, the one-way flap design guarantees backflow is eliminated for every patient

Easy to connect

Developed for use in-line with traditional medical equipment, reducing discomfort for both the patient and hygienist
