

How-to Recycle your CBD Bottle

Step 1

Remove the bottle dropper top from the amber bottle. Remove the tubette portion of the dropper from the rubber top. Set the rubber top aside.*

* Please note that, while the rubber portion of our bottle toppers are not traditionally recyclable, you can reach out to rubber mulch facilities or other industrial rubber processing facilities to find a use for your discarded rubber.

Step 2

Thoroughly rinse your bottle(s) with warm, soapy water. Scrub the inside of your bottle with a mini-brush, where possible, to fully remove all residue.

Step 3

Recycle your glass bottles and glass tube as part of a single or dual-stream recycling option near you that specifies it allows glass. Voila!
