

# CELAINE

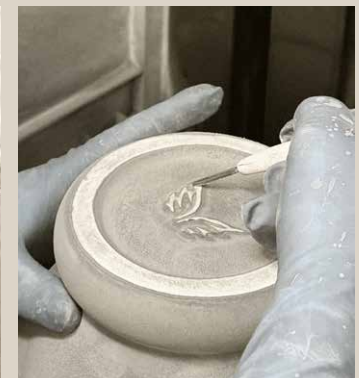

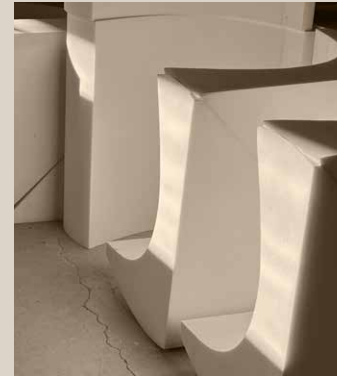

## BRAND STORY

**Celaine** is a luxury lifestyle brand and design studio creating timeless works that surpass trends and journey with their owners throughout a lifetime. The designs are mostly defined by the integration of soft lines, rounded edged and curves. Everything we create is designed to last a lifetime in your home. They pride themselves on attention to detail, refined craftsmanship and conscious production. Crafted in small batches, resulting in one-of-a-kind pieces refined by expert hands to ensure the quality of the final product.

We say it's handcrafted, but really...  
it comes from the heart.

FOUNDER

*the* MIND

QUINCY VAN KAMPEN

Born in Amsterdam  
The Netherlands

In the midst of the epidemic in 2020, Quincy van Kampen founded Celaine. She became passionate with ceramics shortly before the crisis during a trip. She was convinced that now was the ideal time to bring her visions to life because of how quickly the world was changing. This required her to develop her designs in the Netherlands while the borders remained closed.

With a strong focus on branding and creative expression, the journey on building a brand started. After selling ceramics for two years both online and in stores across Belgium and the Netherlands. It was time to take the next step toward creating the lifestyle brand she had always envisioned. In 2023, the first couch design is introduced as part of a larger product portfolio.

“EVERYTHING THAT HAS *happened* SINCE THE START OF *Celaine*, HAS BEEN AN *organic, intuitive* AND *heart-driven* JOURNEY.”

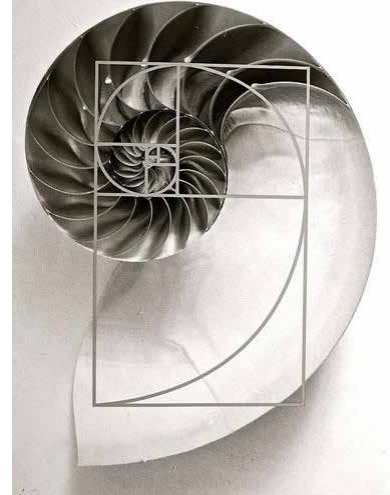

## DESIGNER

*the* DESIGNER  
ANNA BONOTTO

Born in Bassano del Grappa  
Italy

Anna joined the company in its early stage as a Graphic Designer. Designing is in her veins and her work is the first step in making sure that our visions become reality. With Anna coming from a creative town in Italy, it was only a matter of time before we headed there. We moved the production of our ceramics to Italy in 2021.

“A designer  
is a planner  
with an  
aesthetic  
sense.”  
—Bruno  
Munari

WHERE *Dutch* AND *Italian Design* MEET.

Creativity always comes first: designs start with an idea and the technology follows. Every design is sketched in our Amsterdam based studio. **The production** of our ceramics takes place in **Italy**, while our furniture is made in **The Netherlands**.

*Every day* WE ARE INSPIRED BY *nature*.

## DESIGN *philosophy*

Good design is as little design as possible. Simple yes, easy no. We always make sure our designs are thoughtful, strong yet timeless. **Nature** is our greatest inspiration.

## *our* APPROACH

We believe in working together with people who share the same values as we do. Therefore, working with our manufacturers and clients is primarily done intuitively.

## *our* INTENTIONS

By providing insight into our manufacturers and communicate the story about the craftsmanship. We aim to encourage a deeper connection and understanding between our clients and **Celaine**.

AN ODE TO...

*la*  
**LUNA**

Whether you're  
looking for a  
**statement piece**  
or a **comfort**  
**chillout spot**,  
our Luna Sofa  
has what  
it takes.

Every module consists of **sustainable, high-quality materials** that are super **lightweight**.

**4 modules** & many ways to put them together.

Thanks to the stiff bottom of our modules, the pieces don't move from side to side easily. For that reason, the pieces don't have to get attached to each-other, this makes it easy to switch set up whenever you desire!

## SUSTAINABILITY

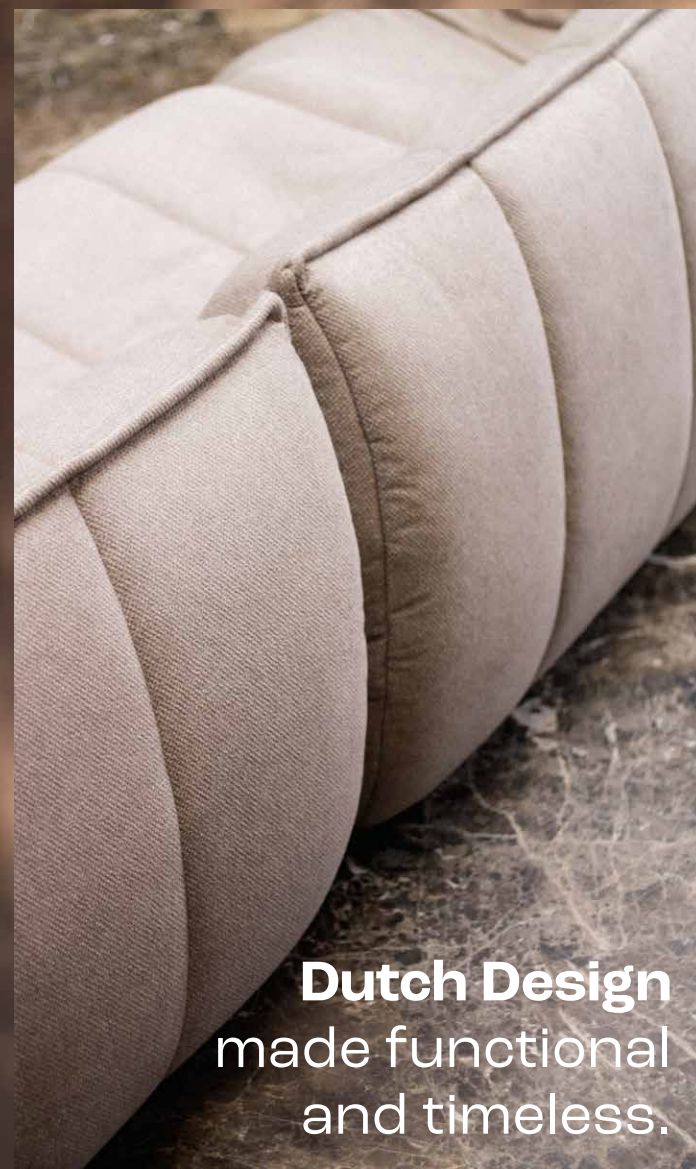

*A better* WORLD.

Throughout the production chain, we have built a base of strong and trusting relationships with suppliers based in The Netherlands and Italy. We know the people behind the products and by producing at smaller (family) businesses we support the communities and retain their long experience of craftsmanship.

We believe that while some trends may come and go, caring about our world and those in it will always be in style. By keeping everything close to our heart and home, we believe this ensures the end results and high quality of our products. It's important to us that our manufactures work in the right environment. Besides that, it saves a lot of transport emissions which is better for our world.
