

IMPORTANT! - FOLLOW THESE STEPS TO ENSURE ACCURACY

1. Before printing ensure that the “scaling” is set to “NONE” in the print dialog.
2. Measure the line on the left and verify that it is exactly 2 inches once printed.
3. If the line does not measure 2 inches adjust your print settings and re-print.

METHOD 1 - PAPER SIZER

1. Carefully cut out the paper sizer below. Cut through the area marked “cut slit here” for the ruler to slide through.
2. Wrap the sizer around your finger with the numbers facing out and slide the rounded end through the opening.
3. For more accurate results, pull the sizer tight over the widest part of your finger. This could also be your knuckle.
4. Read the number that lines up next to the slit. This is your ring size.

TIPS

- Measure your finger later in the day when it is at its largest.
- Avoid measuring your finger when it is cold, this is usually the smallest.

METHOD 2 - MEASURE AN EXISTING RING

1. Choose a ring that fits your finger already.
2. Place the ring over the circles below by matching the inside of the ring with the closest circle.
3. If the ring falls between two sizes, select the larger size.
