## ABOUT US

### TIMELESS DESIGN

All our designs are intentionally timeless. They withstand trends and associate well with different styles, and they can be passed on from one home to the next, carrying over the stories of one lifetime into another. Our collections go back to the essence of what we believe is good design: pieces full of character, made from quality materials that ages beautifully. We love that solid wood evolves with the years as it carries the marks of the life that happens to it.

We create collections for every room of the house: from the furniture that defines the purpose of a space to the objects that layer it with meaning. Nothing excites us more than seeing how people love and use our products in the story of their life.

### CRAFTSMANSHIP

Outstanding craftsmanship is at the core of our brand, and behind the simplicity of our pieces lies a constant drive for innovation. Incorporating advanced techniques to our process of creation, each new design is revised and reworked to the last detail: every curve, texture and line reflects our design values.

## CARE INSTRUCTIONS

### WOOD

The wooden items are varnished with a water-based topcoat to repel common substances and fluids, such as coffee, tea and wine. However, the protective coat is no foolproof guarantee against stains. In case of a spill, remove it immediately.

For regular dusting, use a dry cloth. For a more thorough cleaning, use furniture polish with a soft cloth.

### GLASS & MIRROR

Wipe the glass or mirror surface with a neutral glass cleaner and soft cloth.

### METAL

Dust regularly using a soft dry cloth. For a more thorough cleaning, use mild soap and warm water. Rinse with clean water and wipe dry. Do not use steel wool, sandpaper, mineral acid, bleach, or chlorine cleaners on metal surfaces.

## **TABLES WITH METAL BASE**

Do not drag tables along the floor, as it might damage the protective coating, cause rusting or leave permanent marks on the floor. Always lift the furniture when moving them from place to place.

Always ensure water and solutions do not come into contact with the furniture's metal base and the wooden floor, as it might leave permanent marks on the floor. Some wood species, such as oak, contain tannin, which causes the wood to react with metal and leave permanent stains.

*We create the foundations of your home,  
to inspire the stories of your life.*
