

VICTORIA'S JEWELLERY

SINCE 2010

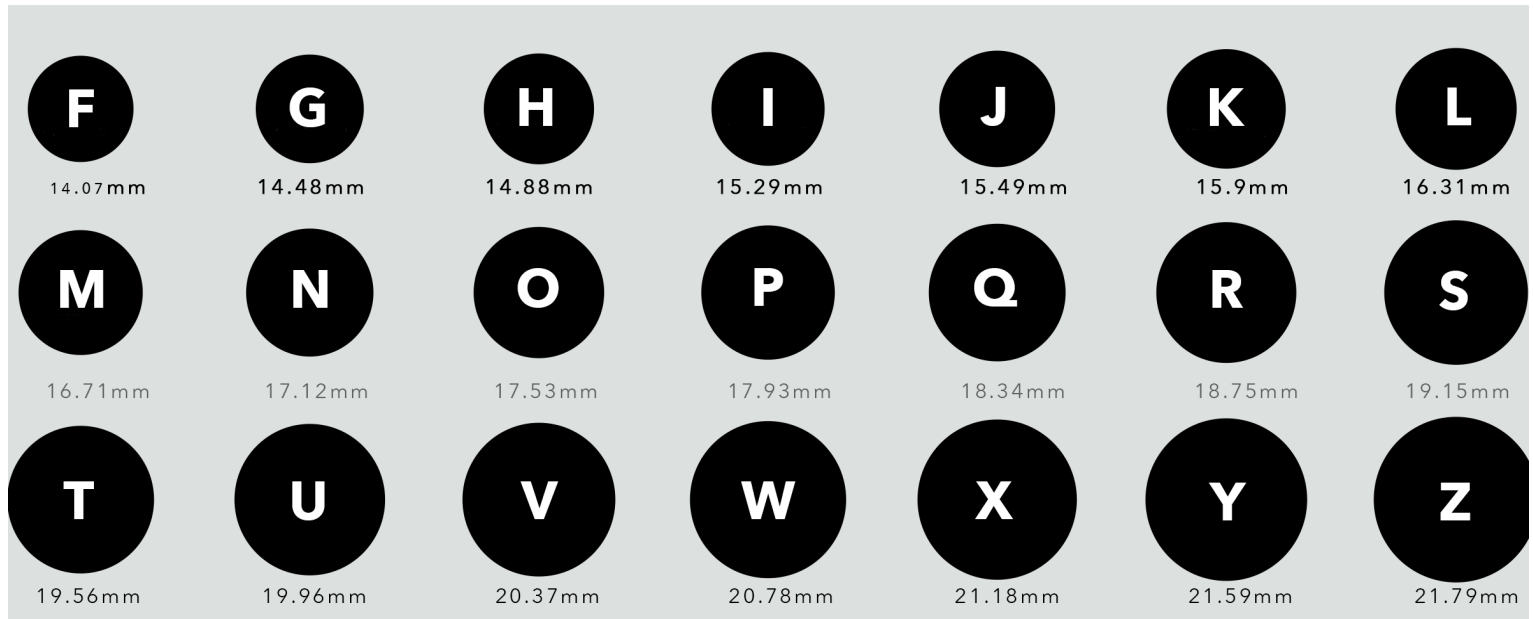

AT HOME RING SIZE GUIDE

Make sure you print this guide on A4 size paper and that it is scaled to 100% in your printer settings. To check that it has printed to correct size, place a credit card on the guide below. The edges of your card should match up with the lines.

Measure an existing ring

Use one of your rings that fits comfortably and that you wear on the same finger that you would like to wear your new ring. Place the ring on the circles below and once you find the size you should see only black with no bits of grey. We can do half sizes too, if your ideal size falls between two circles.

Visit a jeweller near you

The most accurate measurement will still be from a jeweller near you. It's quick and easy and will give you the confidence that your sizing is correct.

Have a look at our at home ring sizer for purchase on our store, these work great and can be reused over and over. For any assistance with finding your ring size get in touch with us.
