

Manual For Flow Meter Timer

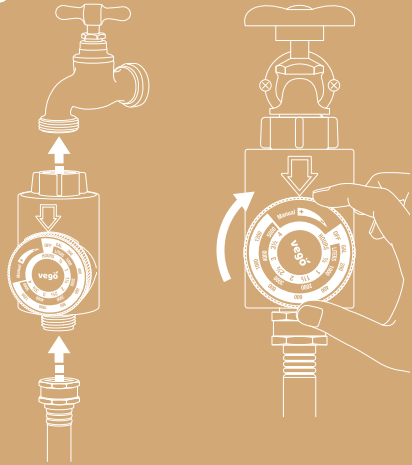

Video User Guide

www.vegogarden.com/assembly

- The all-in-one Vego Flow Meter Timer is an indispensable tool for measuring water flow volume in gallons or liters. The timer can be set to measure up to 1400 gallons (5000 liters) and displays the approximate time it will be used.
- This product is intended for outdoor use only.
- Do not use water over 115° F. (46° C).

Installation And Use

1. Attach the flow meter timer to a faucet.
2. Connect timer to a hose.
3. Turn on the faucet.
4. Turn the dial clockwise only and to a desired water volume. If you turn past the desired number, keep turning clockwise past "OFF" and reset.
5. The flow meter timer will turn off automatically after water delivery is completed.

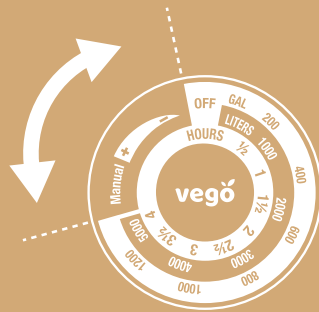

Manual Watering

The Manual section of the device is for non-timed use, allowing water to flow through without metering.

Adjust the dial back and forth in the area marked (+/-) to reach your desired water flow rate.

Manually adjust to "OFF" if you want to stop watering.
