

General Manual For Quick Connector

Video User Guide

www.vegogarden.com/assembly

Caution:

Use outdoors with cold water only.

Freeze Prevention Tip: Thoroughly drain adapters and connectors during winter to prevent damage.

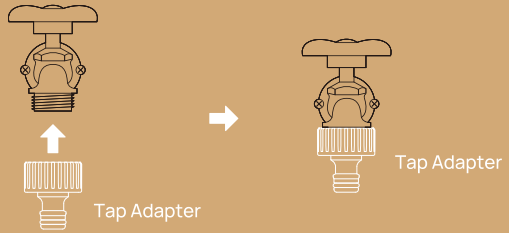

This manual applies to all Vego Quick Connectors, part variety and quantity depend on the purchased model.

User Guide

For Tap-End

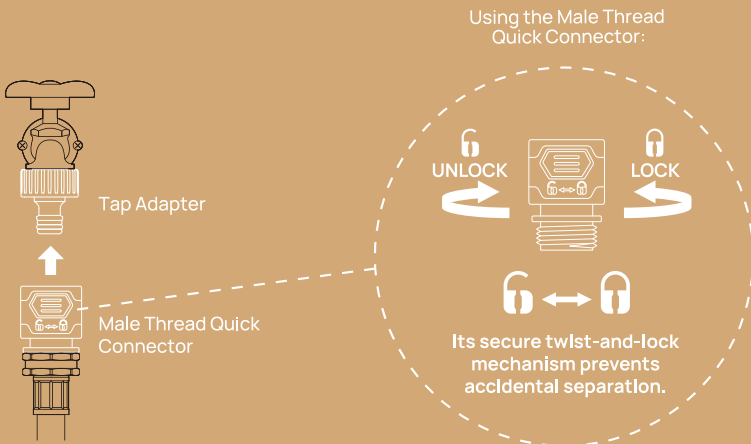

- 1 Attach the Tap Adapter to the faucet.

- 2 Attach the Male Thread Quick Connector to the end of the Hose Female Thread.

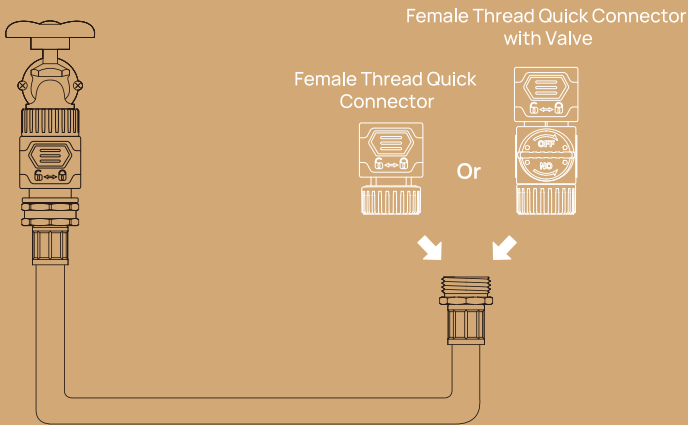

- 3 Snap and secure the Male Thread Quick Connector onto the Tap Adapter.

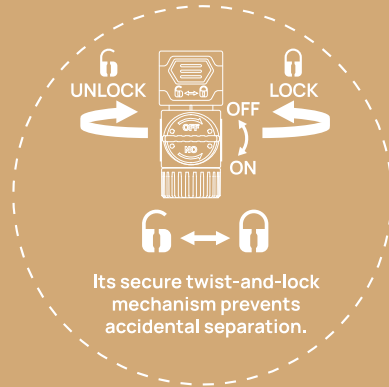

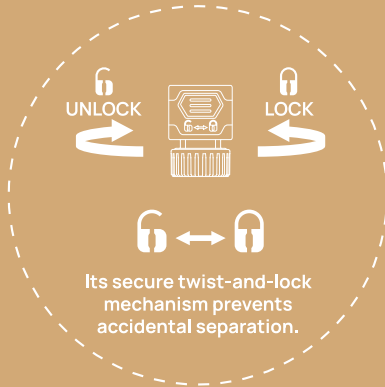

For Tool-End

- 4 Attach the Female Thread Quick Connector or Female Thread Quick Connector with Valve to the end of the Hose Male Thread.

How to use

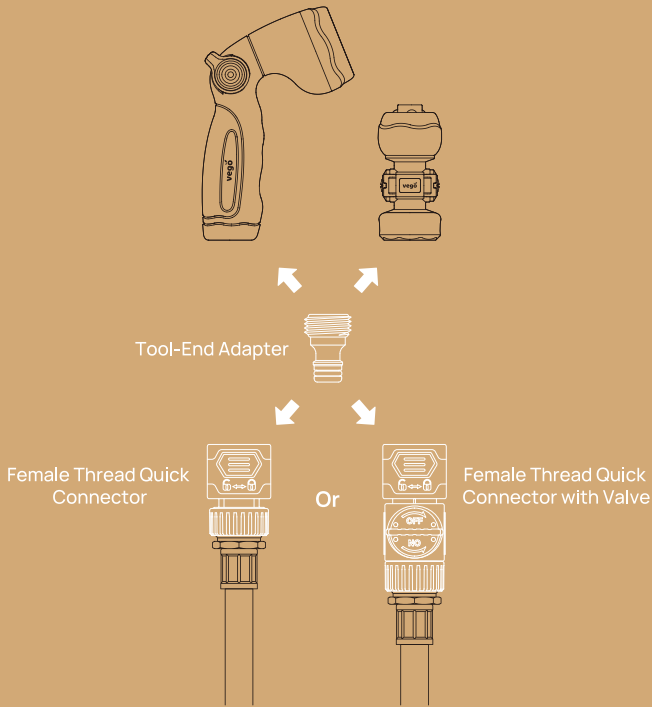

Using the Female Thread Quick Connector with Valve:
Adjust water flow as required to suit your needs.

***Female Thread Quick Connector: Comes with built-in water stop feature, so you can change your tools without getting wet.**
