100bp DNA Ladder RTU (Ready-to-Use)

Catalog Number	Unit Size
DM001-R500	50 ug / 500 ul

Storage : Stable for up to 6 months at 25°C.

Stable for up to 12 months at 4°C.

Stable for up to 24 months at -20°C.

Description

A unique combination of PCR products and a number of proprietary plasmids digested with appropriate restriction enzymes to yield 11 fragments, suitable for use as molecular weight standards for agarose gel electrophoresis. The DNA includes fragments ranging from 100-1,500 base pairs. The 500 and 1,500 base pair bands have increased intensity to serve as reference points. The approximate mass of DNA in each band is provided (0.5 ug a load) for approximating the mass of DNA in comparably intense samples of similar size.

Source

PCR products and double-stranded DNA digested with appropriate restriction enzymes, are phenol extracted and equilibrated to 10 mM Tris-HCl (pH 8.0) and 10 mM EDTA.

Range: 100-1,500 bp

Number of bands: 11

Concentration: 100 ug/ml

Package: 50 ug/500 ul

Recommended Load: 5 ul / well

Containing orange G & xylene cyanol FF as tracking dyes.

1.7 % TAE agarose gel
