

Simplifies the use of the resins and makes the purification process rapid and painless

EMPTY COLUMNS

Empty Columns

For working with gel volumes of 100-200 μ l Plastic Small Columns, 0.5 – 2 ml Plastic Columns or 2 – 6 ml Plastic XL Columns.

Empty Syringe Cartridges

A single use solution that makes the purification process simple and rapid. Pack 1 ml of resin and recover your purified protein in no time.

Empty Mini Columns

For purifications using small quantities of resin (100– 250 μ l). A single-use format for centrifuge purifications.

Empty Spin Columns

Allows working with small quantities of resin, from 50 to 100 μ l. For purifications with syringe (luer lock system) or by centrifugation.

Order Information

PLASTIC COLUMNS

CS-20	20 units
C-50	50 units
CXL-50	50 units

EMPTY SYRINGE CARTRIDGES

ESY-CTG 1-5	5 units

Simplifies the use of the resins and makes the purification process rapid and painless

All Columns and Cartridges are ÄKTA compatible.

FPLC ACCESORIES

Empty FPLC Columns

Single use with four different sizes (8ml, 30ml, 45ml & 80 ml) easy to pack, robust construction. For moderate pressure. Long shelf-life.

Empty Cartridges

For use with any type of chromatography media (> 20 µm). Single-use Empty Cartridges in practical 1 ml size. Reduce cost!

Empty Acrylic Column

Economical alternative to glass columns. Use it to purify different types of proteins and avoid cross-contamination. Pack up to a volume of 8ml of resin.

Flexi-column

Designed to work with three different gel volumes (4, 6 & 8 ml). Each kit includes 2 columns with 6 interchangeable frits each (3 small and 3 large). Combine kits to maximize your packing volume. No need for special adaptors.

Order Information

EMPTY FPLC COLUMNS

8 ml Columns FPLC8-3	3 units
30 ml Columns FPLC30-2	2 units
45 ml Columns FPLC45-2	2 units
80 ml Columns FPLC80-1	1 unit

EMPTY FPLC Columns supplies

FPLC Luer lock-male FPLCLM-1	1 unit
FPLC Luer lock-female FPLCLF-1	1 unit
